

Environment Variable Names  
6/20/2000

Below are a list of suggested names for setting environment variables. What I anticipate is, in the effort to make data and projects more portable, local drives will require an environment variable. This list is in no way complete; it only suggests a naming convention and some likely drives.

MYCD	Local CD drive
MYPLOTTER	Plotter port (eg. \\MS-CCFO\Plotter2)
MYJAZ	JAZ drive
MYZIP	ZIP drive
MYDRIVE	User-defined drive
