Resurvey of Second Standard Parallel North through R. 1 W.

Survey commenced July 11th 1890 with a W. & L. E. Gurley light Mountain Transit with Solar attachment. At the standard corner to Tps. 9 N. R. 1 E & 1 W. in latitude 41° 28' N. Long. 111° 53 1/4' W., I observe Polaris at its eastern elongation at 0.h 6.m mean solar time, and find its magnetic bearing to be N. 16° 6° W.

Northend of needle 16° 6' E.
The azimuth by tables is 1° 39' E.
The sum is the variation 17° 45' E.
I lay off the azimuth to the west, and mark the true meridian so determined by driving a stake 4 chs north of corner.
On the morning of July 12. 1890 I test my Solar Transit on the line established last night and find it to correspond with variation obtained.
I begin at the Standard Cor. to Tps. 9 N. R 1 E & 1 W. on Salt Lake Meridian which is a boulder 10 x 3 x 9 above ground marked S.C. with 6 notches on N.E. & W. edges and a stone mound alongside, Thence I run

BOOK-A-234

Surveys Resurvey of fract. Subs. Tps. 8 N. R 2 W.

Survey commenced July 14th 1890 with a Gurley Lig^t Mountain Transit with Solar attachment. At the corner to tps. 7 & 8 N. R 1 & 2 W. in Latitude 41° 23' N. Longitude 112° 00' 42" W. Observe Polaris at its eastern elongation at 11 h. 51 m. p. m. mean Solar time and find its magnetic bearing to be N. 15° 51' W.

North end of Needle 15° 51' East
The azimuth bearing in Manuals 1° 39"
The sum is variation 17° 30' E.

I lay off the azimuth to the west and mark the true meridian so determined by driving a stake 2.50 lks. North of Corner.

July 14th 1890

On the morning of July 16 1890 I test my Solar Transit on the line established the previous night and find it to correspond with the variation obtained.

Dec. 23 / 1892.

Resurvey of Fract. Sublic. T. 9 N. R 2 W.

General Description.

The lands surveyed and re-surveyed in this township consist in the Eastern part mostly of rolling benches and foothills of high Mountains covered with dense sage brush and scattering scrub Cedars and pines.

The S. western part consist mostly of alkali flats, slough and salt grass flats.

The northeastern part is good farming land, mostly all under cultivation.

It is traversed by Bear River which is joined on each side by large fertile River-bottoms. Bear River is a large stream and carries fine water. In N. W. part of Sec. 6. is part of the townsite of Corinne located. Corinne has about 100 inhabitants, several churches, 1 bank

and a number of stores. It is also station on the Central Pacific Railway, which latter traverses this township from S.E to N.W.

The Union Pacific traverse the township from S. to N. The records in U.S. Surveyor Gen. Office shows two mil tails to cont. D.E. 2462. Carolina M.J. Roche, Comm. unsurveyed fract. NW¼ NE¼, fract. NW¼ & fract. NW¼ SW¼ sec 8. cont. 170 acres. D.E. 96. Lorenzo Don Newman unsurveyed portion of sec. 6. T. 9 R 27 E. embracing an island on Bear River in said section. cont. 104.89 acres.

It was utterly impossible to locate the two entries as the situation of the River and surrounding land is entirely different as to what the entries call for—the mean declination for the past yr 17°40 E.

[4.—FINAL OATHS OF ASSISTANTS.]

We hereby certify that we assisted Edward W. Korber, United States Deputy Surveyor, in surveying all those parts or portions of the Fract North Wet boundary Tp. 10 N R. 2 W. Fract. Subdivisions & Meanders Tp. 9 N R 2 W and Wet boundary Tp. 9½ R. 2 W of the Salt Lake base and meridian in the Territory of Utah, as are represented in the foregoing field notes as having been surveyed by him and under his direction; and that said survey has been in all respects, to the best of our knowledge and belief, well and faithfully surveyed, and the corner monuments established according to the instructions furnished by the United States Surveyor-General for Utah.

(6.—FINAL OATH OF UNITED STATES DEPUTY SURVEYOR.)

I, Edward H. Kreber

United States deputy surveyor, do solemnly swear that in pursuance of instructions received from Ellsworth Daggett United States surveyor-general for Utah, bearing date of the fourth day of June 1890, I have well, faithfully, and truly, in my own proper person, and in strict conformity with the instructions furnished by the United States surveyor-general for Utah, the surveying manual and the laws of the United States, surveyed all those parts or portions of 2nd Standard Par. North through R 1 & 2 W, N.S.W. boundaries Tps. 9 & 10 N. R 2 W. Inct Subdivisions Tps. 8. 9. 10. & 11 N. Ranges Tp. 9 N R 2 W.

of Sult Lake base and meridian in the Territory of Utah, as are represented in the foregoing field notes as having been surveyed by me and under my directions; and I do further solemnly swear, that all the corners of said survey have been established and perpetuated in strict accordance with the surveying manual, printed instructions, the special written instructions of the United States surveyor-general for Utah, and in the specific man-

ner described in the field notes, and that the fore-
going are the **TRUE** *field notes of such survey;*
and, should any fraud be detected, I will suffer
the penalty of perjury, under the provisions of
an act of Congress, approved August 8, 1846.

BOUR-A-234

Survey of Westboundary Tps. 10 N. R2W.

Note: For cause that there is such a great difference in the date of survey East and West of Bear River is that in summer 1890 when I extended my surveys across Bear River and west of it I found a large discrepancy to exist, which it was impossible for me to adjust in the field. I was obliged to stop work and report the facts to the U.S. Surveyor General for further instructions.

On accordance with my Special Instructions dated Decbr. 17 and after having myself satisfied by actual fieldwork and testimony from old settlers and from County Surveyor, that the so called "Sand Creek

Resurvey of Wellbommdary Tp. 10N

corner, is the true corner
point to tps. 10 & 11 North
R 2 & 3 W. and a post at
the intersection of three
faces 500.94 chs. S. of the
Sandbank corner is the true
corner point to tps. 9 & 10 N.
R. 2 & 3 W., & divide the former
distance of 500.94 chs in
twelve equal parts; each
part being 41.745 chs and
set corners at every 41.575
and 83.49 chs.

On addition to my report
to special instructions dated
Nov. 3. 1892. and to addi-
tional special instructions
dated Decr. 7. 1892; I return
herewith sworn affidavits
as to the correctness of the

BOOK A-134

Remarks, Remarks first Subs. Tp. 10 N R 2 W

General Description.

The lands surveyed and re-surveyed in this township consist mostly of brush land covered with sage brush and in the N. E. part are some hilly & steep mountains covered with Cedars and pines. All along and West of the foothills and bluffs is good agricultural land most of which is cultivated and worth watered.

There are a number of houses and other buildings, but I was unable to get the names of the owners, as some were intimidated and others the people were out.

I did not find any indications of mineral, although I heard some talk about some old prospects being there.

The mean declination

[5.—FINAL OATHS OF ASSISTANTS.]

We hereby certify that we assisted Edw. W. Korber *United States deputy surveyor, in surveying all those parts or portions of the* 2nd Standard Par. North through R. 1 E., W. to N. W. Boundaries Tps. 9 & 10 N. R 2 W. Fract. Subd. Tp. 8. S. No. 8 11 N. R 2 W.

of the Salt Lake base and meridian in the Territory of Utah, as are represented in the foregoing field notes as having been surveyed by him and under his direction; and that said survey has been in all respects, to the best of our knowledge and belief, well and faithfully surveyed, and the corner monuments established according to the instructions furnished by the United States Surveyor-General for Utah.

Survey and resurvey Subs. Tp. 11 N. R 2 W.

Survey commenced July 25 1890 with a W. & L. E. Gurley Solar Mountain Transit.

Set the corner to secs. 35 & 36 on South boundary of township in Latitude 41° 38.17' N. Longitude 112° 05' W. Observed Polaris at its eastern elongation at 11 h. 11 m. 11 s. p. m. mean Solar time and find its magnetic bearing to be N. 16° 10' W.

Northend of needle 16° 10' E.
The azimuth by table in manual is 1° 40'
The sum of variation is 17° 50' E
Sky'd the azimuth to the west and mark the true meridian so determined by driving a post 3.50 chs N. of corner.
The N. and E. boundaries and 13 & 24 having been surveyed from the east while the S. & W. boundaries and three tiers of secs farthest west have been surveyed from the west, which causes a difference of 7 - 7.50 chs easting and westing. July 26 1890

General Description.

The lines resurveyed under this Contract in this township are mostly over level benches and valley lands, partly under cultivation. The resurvey embraces the mountain range between Cache Co. and Box Elder Co. The mountains consist of very steep sharp and rocky ridges, with rolling benches at the foot of them. The benches are covered mostly with sagebrush and greasewood. The mountains are covered with a dense growth of underbrush, partly bare and rocky. There are some large patches of valuable pine timber, also small quakenasp. The timber is in the highest part of the mountains while on the lower ridges and benches there is only Scrub Cedars and pinon to be found

Survey and resurvey Subs. Tp. 11 N R 22 W

I was told that there are quite a number of springs during the forepart of the season, but at the time of the survey I failed to find any more, than are shown.

In secs. 21. 16. & 8 there is considerable land under cultivation, there are a few shanty's in secs. 4 & 21 That are only used at the time the farmers put in their crops or at harvest time.

The farmers own these field lots in the western part of the township.

At the time of the survey the towns were uninhabited & did not find any indication of minerals during this survey.

The mean declination for the plat is 17° 50' E.

Topographical description.

The land embraced in this survey of the mineral claims of Jennie Lambert, Chas. Lambert & Fred Lambert is mountainous, & that portion of it is unfavorable to access for the ordinary purposes usually contemplated in mineral entries. The mineral deposits are chiefly quartz veins.

There is considerable timber and scattered timber of commercial value, but it is hard to get out on account of the mountains.

The most of this land is unfit for agriculture, but is covered with abundant growth of nutritious grasses.

The true declination for the plat, the result of our observations is 16° 45' E.

Found Stone Mound, of Cor. No. 1, on the W.B. of the N.E. Sec. 13, T. 2 S. R. 20 E. M.

Found Cedar Bushes & X. W. Bearing on the W.B. of Sec.

22 has a good wire fence on the West and a part of the South side of the land.

Signed Embraces No. 2 Rt. of Ws. Southwickton Rte. & of the N.E. & of N.E. & of Sec. 2. has no improvements.

T. 7, N., R. 2. E.

Note; Before commencing the survey of T. 7. N. R. 2. E. I found it necessary to employ Cannon Halling as axeman for this township, and as there was no officer authorized to administer the oath, within a distance of several miles, to have had-elled which it would have caused considerable delay and expense. I administered the oath myself—

Thence North 40.00 chains to the true point of beginning, containing 640 acres.

Dec. 11th 1875.

General description

This township is traversed by the Middle Fork of Cache River, the high lands of which generally characterize the topography.

There is considerable timber of commercial value on it, near the base of the mountains, a small part of which has been cut by settlers in clearing land,

(Sgd) Clerk to U.S. Surv. [illegible]

The boundaries, meanderings, and
contents, and descriptions of
the several lots of the survey,
have been approved by the Commissioner
of the General Land Office, which Plats
for [illegible] are to be filed for
the use of the local Surveyor.
There are no settlers on the boundaries
of this [illegible].
There is no improvements found on the
township.
The present determination for the
field, the result of one observation
is 16° 5' E.
Upon the meridian determined
by observation on Polaris. I verified
the adjustments of my transit,
during the survey of this town[illegible]

Exterior Boundaries T. 9 N. R. 1 W.

Survey commenced Nov 12th 1895 with Burley Mountain transit with solar attachment.

Preliminary to commencing the Survey of this township, I go to the corner to Secs 7. 12, 13 and 18. on West boundary of township. which is a sandstone 10 x 8 x 6 ins. above ground, marked with 4 notches on E and 2 notches on N. edges. No Mounds or pits. Set mete wire fence course E & W. in Lat. 41. 31' N. Long. 112. 01' W. at 9.50 m. mean Solar time. I observe Polaris at its upper culmination and set a flag in line therewith. 3 chains North. At 8.00 m P.M. Nov 13th flag bears N 16. 45' W. As star was at Upper culmination at time of observation makes Va 16. 45' E.

Nov 12th 1895

Subdivisions T. 10 N., R. 1 W.

General Description —

The land embraced in my survey of this township is all high mountains —

The timber consists of a few groves of Spruce & scattering Cedars.

The land is unfit for agriculture & not very good for grazing —

There is no water on the land.

There are indications of mineral on the West ½ of Sec. 30.

The mean declination for the field - the result of one observation is 16° 46' E.

All lines were run by the solar which I tested each day upon meridian determined by observation on Polaris.

veyor-general

[6.—FINAL OATH OF UNITED STATES DEPUTY SURVEYOR.]

I, John Thomas Richard, United States deputy surveyor, do solemnly swear that in pursuance of instructions received from Clinton Doggett United States surveyor-general for Utah, bearing date of the 6th day of June, 1893, I have well, faithfully, and truly, in my own proper person, and in strict conformity with the instructions furnished by the United States surveyor-general for Utah, the surveying manual and the laws of the United States, surveyed all those parts or portions of Subdivisions of T. 7 N. R. 1 W., Extension & Subdivisions of T. 7 N. R. 2 E., Extension & Subdivisions of T. 9 N. R. 1 W. Subdivisions of T. 10 N. R. 1 W. Extension & Subdivisions of T. 10 N. R. 2 E.

.....

.....

.....of Salt Lake base and meredian in the Territory of Utah, as are represented in the foregoing field notes as having been surveyed by me and under my directions; and I do further solemnly swear that all the corners of said survey have been established and perpetuated in strict accordance with the surveying manual, printed instructions, the special written instructions of the United States surveyor-general for Utah, and in the specific man-

ner described in the field notes, and that the fore-
going are the TRUE field notes of such survey;
and, should any fraud be detected, I will suffer
the penalty of perjury, under the provisions of an
act of Congress, approved August 8, 1846.

John Thomas Breckon
United States Deputy Surveyor

Subscribed and sworn to before me this 23d
day of September 1894

Monument No. 1 T.9.N.R.2.E.

Survey Commenced Nov. 6th 1893.
With Surby Mountain Transit
with Solar Attachment.
Preliminary to commencing the
survey of this boundary, I go to
the Cor. to Sec 9 & 10. T. R's 1 &
2 E. which is a Sandstone
12 x 12 x 8 ins. marked & witness-
ed as described in field notes
furnished by the Surveyor
General. Was this corner does
not appear to be very durable
and the marks are almost
obliterated, I set a Sandstone
24 x 18 x 12 ins. 18 ins. in the
ground in identical place
of old corner, & marked with
6 notches on N. E. & W.
edges. Lat: 41° 33' N.
Long. 111° 47' W.
Having set the instrument
over the centre of the corner I
directed the telescope to Polaris
Dist. 9° 55' P.M. local mean
time of Upper Culmination. I

North boundary T. 9. N. R. 2. [W.]

Chains

Found iron pipe marked 1/4 S. 6 bears N. 1 deg. 15' W. At the above point of observation makes Var 17 deg. 15' E. Also for future reference I mark the true meridian as determined by observation bearing a stake in line 2 chains north of corner.

Nov. 16th 1893.

From the township corner I run east on a resurvey line between Secs 6 and 31.

Var 17 deg. 15' E.

40.00 No trees of old corner

78.10 The cor. to Secs 5. 6. 31 and 32. bears North 8.40 chains dist. which I find is a sandstone 10x10x6 ins above ground, marked and witnessed as described in field notes furnished by the Surveyor General

---

From point 8.40 chains N. of Corner

Chains

From point of observation bearing 6 [illegible] N. 1 deg. 15' W. As the above was a temporary termination of the line of observation makes Var 17 deg. 15' E. Also for future reference I mark [illegible] 40.00 No trees
true meridian as determined by 0.72 The corner
bearing a stake in line 2 chains
north of corner.

Nov. 16th 1893.

From the township corner I run east on a resurvey line between Secs 6 and 31.

Var 17 deg. 15' E.

May 31st 1894,

General Description

The land in this township is all in high mountains and at an elevation of about 2000 ft. above Cache Valley adjoining the west side of the Mountain range, and at an elevation between 8000 and 9000 feet above sea level. Paradise Hly and Hyrum Hly Cañons are dry most of the year.

The tops of the mountains are covered with a luxuriant growth of grasses which makes excellent pasturage. The are several groves of fine spruce timber, the best of which has been cut-

Subdivisions T. 10. R. 2. E.

Red taken away by settlers from Cache Valley -

There is no mineral found in the township of any value.

The mean declination for the plat, the result of three observations is 17°. 16'. E.

A. Greggerson has a house and Barn, and some plowing and fencing on Sec. 9.

Black Smith Fork river runs west across the north part of the township.

John S. Beckwith
U. S. Dep. Surveyor.
