Fractional Re-survey S. Bound. T. 3 S R 4 W.

Chains

Survey commenced June 16th 1879

Note: After careful examination and diligent search I find that the cor. to secs 5. 6. 31 & 32 is the most eastern cor. on this line capable of being duly identified. It consists only of a decayed stake in a sunken mound but several old settlers assure me that it is the original cor. and by resurveying the adjoining section lines I satisfy myself of its being in the right place - Therefore from the above described cor. to secs 5. 6 31 & 32 on S. Bound. T. 3. S. R 4 W. S. L. M. I run

September 10th 1879.

Adolphe Jansen—
U. S. Dep Surveyor.

BOOK-A-16

General Description.

This survey embraces the bottoms of Pine & Dry Canyon with adjacent benches & foothil Being within a couple of miles of the large settlemen of "Tooele" & "Pine Creek" m of the land is claimed for the pu pose of "dry farming" which has been tried with great succes at this place. A portion of the land can be irrigated from Pin Creek & Ada Spring. The soil is very rich but rocky & gravelly in places. A large portion of the land is covered with w dense growth of oak & maple bus

General Description —

The additional survey in this T/p, embraces the fertile flat noted by Coon Creek, and the adjacent benches & foot hills on the S. & E.

I surveyed as close to the meanders as possible in order

BOOK-A-161

to embrace several
nice springs, and
streams as well as
timber.

The flat above men
tioned can be irrigat
from Cow Creek an
is to a great exten
already under cul=
tivation. The larges
settlement in the Di
is called "Kanosh
it contains about 45
inhabitants, and is
located in secs. 17 &
20. In sec. 6. is
Petersburg settlement
with nearly 70 inhab
itants. About 50

BOOK-A-161

T. 22 S. R. 16. W.

General Description

The lands embraced in this survey consist mainly of a large, level meadow wet & marshy in ordinary seasons, but unusually dry at this time.

The soil is 1st rate, but strongly impregnated with alkaline matter. If the ground was properly prepared & drained it would no doubt produce good crops of Alfalfa instead of the comparatively worthless scant wild grass. Several tracts are fenced and utilized as hay

meadows and gaie fie
Ancient Volcans Eruptio
are easily traceable in t
as well as in the Tunn
South.

Oct. 29th 1849,

Adolphe Jessen
U.S. Dep. Surveyo

BOOK-A-161

U. S. SURVEYOR GENERAL'S OFFICE

Salt Lake City, Utah, Dec. 13th 1879

The foregoing field notes of the survey of the

Additional Subdivision Lines

Township No 22 S *Range No* 6 W

of the Salt Lake Meridian, Utah Territory,

Executed by Adolph Jessen

Under his *contract No* 94

of the 25th *day of* August 1879

in the month of Oct. 1879

having been critically examined, the necessary corrections and explanations made, the said field notes, and the surveys they describe are hereby approved.

Fred. Salomon

U. S. Surveyor General for Utah.

BOOK-A-161 (161) 262

General Descriptio

From the timbered foothi
in the S. Eastern part of th
Tp. the land slopes ge
N. Westerly forming a lo
level bench, and conv
almost imperceptibly with
the bottom or meadow la
in the three western tier
sections. — Meadow Cree
The largest settlement in
about 200 inhabitants — is
situated in Secs. 21 & 22.
It is watered from Meado
Creek, and has a fe
containing about 6 section
of land, mostly of whi
is meadow, or under
cultivation. There are
several ranches on the

Mead
Wate
Tp.
from
the
slop
Tp
of
Cree
No

meadow lands, in the
Western part of the
Tps. deriving their water
from two large spring branches,
the so called "Meadow Creek
Sloughs" and others.
I found no indications
of mineral in this
Township.

General Description

The survey in this Dp embraces finely timbered beech, and adjacent fort hills.— A great part of the land is unfit for cultivation, on account of the broken nature of the ground, but being within 2 or 3 miles of the town of Fielden, the timber on the land is very valuable.

Meadow & Pine creeks head in this Dp. and several Springs are located on the N. slope

of the mountains.

FIELD NOTES

OF

THE SURVEY OF THE

Additional South Boundary

of Township No. 21S, Range No. 4W.

of the Salt Lake Meridian in Utah Territory.

BY

Adolphe Jessen

U. S. DEPUTY SURVEYOR,

Under his Contract No. 94

dated August 25th 1879.

Survey commenced Nov 12. 1879.

Survey completed " " 1879.

Additional S. boundary T. 21 S. 4 W.

Chains Survey commenced Nov. 12th, 1879.

Note: The cor. to secs. 35 & 36, being established on this line, the remainder should, under ordinary circumstances, be run from that corner, west on random line, & then again back east on a true line, but I find this to be impracticable for several reasons viz: The land in the S. ½ of sec. 35 is unarable, being very broken & mountainous and it is out side of the late Con. Crk Indian Reservation, and therefore, strictly speaking, not included in my contract, besides said corner is in the mountains,

Additional ~~Corrections~~ South boundary of

Chains at present covered with 2 feet of snow, it would be next to impossible to find the said corner, even by retracing all connecting lines therefor from the established corner to T. 20 S. R. 32 E. 5 M., I run
