barren
which a
subject to
the lake
are high

General Descriptio

This fractional T
is broken & hilly -
a range of high h
running nearly N. o
is broken through a
one point by an Elevat
valley, or low divide,
connecting E. & W. Valle

It contains much
good grazing land,
is occupied by stoc
men in winter for
grazing purposes -
The Alkali flat a
the East side of T

barren & worthless, of which a large area is subject to overflow from the lake when the winds are high from the East.

S. SURVEYOR GENER

Salt Lake City,

General Description

The Southern Portion
This Ps. is barren alkal
flat— The W. side is ran
& alkali flat mostly cove
with sage & greasewood.
The Eastern & Middle
Portion is principally
sage brush sloping S. & S.
The N. Western Portion is
Mountainous, with goo
sage land intervales—
No timber. And no wate
save a spring in Sec. 2
of strong alkali water, wit
no outlet—
Excepting the alkali flat
& rocky ridges it is fair
grazing land.

This meander line in frac. sec. 31 is along the East alkali margin of the Lake — The line along the N. margin of Lake is at the foot of Sagebrush bench.

Sept. 1st 1886

General Description

This fractional T/p. Except the low. alkali flat (which is worthless) is mostly on gravelly Ridge & Sandy Sagebrush — good grazing land, and is used for grazing purposes by Sheep herders in winter. It is all well covered with Sagebrush, save the barren alkali flat. — No timber.

And no fresh water
in -
Soil, sandy, gravel
& alkali flat.

General Description

The middle-southern portion of Twp is a valley rising from the low alkali flat N. & W. to foot of mountains — The balance of the Twp. except a narrow strip lying along the lake on the N. W. is mountainous — The land is generally covered with sagebrush; contains much good grazing land, and is used for grazing purposes in Winter. No fresh water, and no timber, except a few scrub cedars in the mountains —

Contract.
Sept 27 1886

General Description

This township is
principally mountainous
& hilly, except on the East
side along the Lake there
a limited area of level
land.- On the mountains
there is much good interval
land, & nearly the whole
Do., except the rocky ridges
is well covered with sage
brush, & greasewood, and is
used as a stock range in
winter - No fresh water
& no timber.
