General Description

The land embraced in the re-survey of this Tp. consists of high rolling hills suitable for grazing or agriculture if water for irrigation can be got out of it. It is mostly covered with a dense growth of oak and maple brush.

General Drscripteon
The land embraced in this
survey of this Tp. consists of very
high broken and rocky Ridges
Deep Gulches & Canons. It is
covered with all Kinds of
undergrowth and some Pine
timber the best of the latter
has been taken out leaving
principally small timber.
There is a steam Saw Mill
in S.W.¼ Sec. 26 and a Water
power saw mill in S.E.¼ Sec.
23. neither are working this
season. The creeks on the
East side of the Divide
are used for irrigation
purposes by the settlers in
the adjoining Tps. The
Water on the West side
of the Divide is also used
for irrigation by the settlers
in the Salt Lake Valley.
This Tp. is not fit for

cultivation on account
of the high altitude
and the rough character
of the Mountains. There
is good grass for grazing
on the W side of the
Divide

General Description

The land embraced in the re-survey of this T.p. consists of high rolling foot hills and bench land a portion suitable for grazing. The balance is a rough, and broken country ~~with~~ covered with dense brush of many species the principal ones being oak, maple wild rose and sage. It is unfit for cultivation There is some scattering Pine and Cottonwood timber The Weber River and U.P.R.R. run through Secs. 27, 28 29 & 30.

General Description

The land embraced in the new survey of this Tp. consists principally of high broken mountains and deep and precipitious Gulches and is covered with dense oak, maple land, wild rose willow and sage brush and is very rocky. It is entirely unfit for cultivation on account of the rough mountains and its high altitude

General Description

The land embraced in the re-survey of this T. consists mostly of good Bench land suitable for cultivation.

There are several streams of good water which could be got out to the land for irrigating.

The improvements made are all of a substantial nature consisting of good brick houses (and sheds) stables granaries etc.

General Description
The land embraced in the new survey of this T. consists chiefly of very rough broken mountains and high benches
The latter may be cultivated, if sufficient water for irrigation can be obtained. It is covered with thick maple, oak, and other brush

Salt Lake Meridian

General Description

Fremont Island is situated in Tp 5 N. R 5 & 6 W S.L.M. in the Great Salt Lake.

M. J. Wenner is the only settler on same. He has made a filing on D.E. No 1608 containing all of frac. Sec. 20

His improvements consist of a frame house of 2 rooms worth about $100.00 about 30 acres plowed and fenced 3 artesian wells with an average flow of 9 galls. pr minute. The water is quite fresh and can be used for culinary and irrigation purposes. Slate has been found on this Tp. but of too poor a quality for commercial use.

General Description

The land embraced in the survey of frac. Tp. 5 N. R 5 W S. of M. consists mostly of high mountains covered with shadscale, sage brush, and some grass. It is suitable for grazing purposes. There is no water on this part of the Island.

Slate is found in Secs. 10, 11, 12 & 13 and some work has been done on a slate prospect in Sec. 10, but was abandoned as the slate found was of no commercial value. There are no improvements on this part of the Island.

Description
7 N., 1 E.

The portion of this T. which lies on the west slope of the east range of mountains consists entirely of gravelly soil that is too high for irrigation. The timber growth consists of oak aspen and small brush which grow in clumps on the north hill sides. There are a few dwarf cedars on the highest peaks and ridges, and a considerable quantity of pine fit for lumber and the canons. The timber fit for use has mostly been felled long ago. What is left is in Secs. 1, 2, 3, 11, 12 & 13, in small patches and mostly inaccessible.

Secs. 31, 30, 19 & 18 lie on the east slope of the west range of mountains.

All of 30 & 31 and the west

Annual Descriptive

The meanders lines of this township passed the same kinds of land as the survey.

The township is mountainous and sparsely timbered.

The soil is not fit for agriculture but makes fair grazing land.

There are no settlements entries of any kind.

J. A. Russell
U.S. Dep. Surveyor.

Land high rolling hills.

Soil & State, rocky,

Timber, pine & cedar scattering

July 27th 1880

General description

This township consists entirely of high mountains, and is of no use but for grazing and for wood timber is. left. There is some timber of good quality still standing among the mountains, but the greater portion has long been felled.

Arthur F. Stevens
U.S. Deputy Surveyor.

598 General Description

T. 8 N. R. 2 E. S.L.M.

This T. consists entirely of hig
mountains; which lie in ridges
trending N. & S. There is some
pine of good quality along
the sides of the mountains
but the greater part of it ha
been removed. There is a steam
saw mill in the S.W. ¼ Sec. 30
The Mill in N.E. ¼ sec. 16 ha
been shut down permanent
There is an old log house
S.W. ¼ of Sec. 16 with a quadrang
tached, which is said to belo
to Swensen. The house has
vacant a long time. Ward
has a cabin in S.W. ¼ sec. 7.
He has made no improvem
and occupies the premises only
as a holding ranch. There ha
been some mining done on
the N. ½ sec. 6 but work is no
suspended.

Arthur F. Bunnell
