General Description

The Northern & Central Eastern sections are open Country with good grass and heavy sagebrush and gritty rolling prairie.

The Southern portion is rough in many places broken by steep bluffs, rocky hills and dense cedar glades. The open spaces are numerous and are covered with good grass & heavy sage brush.

The soil is light & sandy.

The Western portion is much broken and generally covered with dense cedar glades & pinon pine.

The West tier of Sections are on the side of Rock Creek Canon and are impracticable of survey owing to the rugged and broken precipice which marks its face.

The presence of this precipice prevented the running of the West Boundary of this Township.

General Description

The principal portion of this Township being mountainous & very rough, breaking down from the north & south in heavy bluffs cut up by deep cañons The soil is rocky & consequently of little value for cultivation or grazing, and the land being covered with scrub cedars, it was not examined except in the south & south eastern portion which embraces the valley of "Dry Gulch" where a good body of land was found & subdivided. Much of the year, water may be found in holes along the bed of the creek, which is bordered by cottonwood timber, brush & willows. A fine hot sulphur spring is situated in the N. E. corner of section 32.

Township 2 South Range 3 West Uintah Meridian

General Description

The land in this Township may be classified into 1st 2nd & 3rd rate

That portion lying to the N. E. of Lake Fork and running back for 3 miles, is a table land covered with bunch grass and the soil is of the 1st & 2nd rate. The N. E portion is much broken and cut up by several cruds which are dry during the summer season, This district is rough & mountainous, intersected with many water drains & ravines; the hill sides however being clothed with groves of red cedar with openings with patches of nutritious bunch grass.

Lake Fork, a beautiful, clear mountain trout stream whose average width is about 1½ chains cuts its way through a narrow canon and flows in a S. E. direction. The width of its valley is about 40 chains and produces a dense growth of cottonwood, willows & white haw.

The South West part is high rough & mountainous covered with cedars, with considerable sage brush & grass.

Soil 3rd rate.

[FORM OF FINAL OATH OF DEPUTY SURVEYOR.]

I, Daniel G. Major United States ~~Deputy~~ Surveyor, do solemnly swear that I have in my own proper person, and with the necessary assistance, well, truly, and faithfully executed the exterior boundaries & surveys of the subdivisional lines of T. N° 3 South of the base line of Range N° 1 West Uintah Special Meridian in the Territory of Utah.

under my contract with Hon Commissioner Genl Land Office ~~United States Surveyor-General for Utah~~, bearing date, February 23rd 1882; that in making the said survey I have used only such instruments as were approved ~~by the said Surveyor-General~~ exercising due care in the preservation of adjustments of the same; that in using the solar compass I have at no time projected established lines depending for alignment upon the magnetic needle; that I have in all respects complied with the laws of the United States governing public land surveys, the surveying manual, and such additional instructions as have been furnished me by and through the said ~~Surveyor-General~~ Commissioner relating to the aforesaid survey; that I have thoroughly acquainted my assistants in the field with the nature of their duties under the laws and instructions above mentioned, that to the best of my knowledge and belief all assistants so employed have likewise obeyed the aforesaid laws and instructions, and that the annexed field-notes are the original, true, and correct returns of the said surveys.

Daniel G. Major

Between T. 3. S., R. 2. W.

South Boundary

Owing to frequent crossings of the Cheese River & very dense underbrush in Sec. 31 it was deemed more correct to run the Township line West on a random line and back East on a true line.

From the Cor. to Secs. 3 & 4 S. Rs. 1 & 2 W. I run West on random line bet. said Secs., the variation of my needle being 18° 30' E. & set temporary corners at each 20, 40, 60 & 80 chs. & find the S. line to be 3 miles, 78 chains & 97 lks. long & the falling to be 91 Links S. of the corner point to Secs. 3 & 4. S. Rs. 2 & 3 W. which is in the River & which is N. of the Meander Cor. to fractional Secs. 1 & 6 in Secs 4 S. The correction for the true line will therefore be 15 chs. General Description.

Along the Northern boundary of this Township is a table land about 400 ft high which breaks off precipitously into the valley of the Du Chesne, covered with good grass & soil of 1st quality. The valley is crossed by the Du Chesne & Lake Fork rivers which unite near the centre of Township & whose banks are bordered with dense underbrush, cottonwood and willows & white sage. The soil is rich, & with irrigation the greater part except the Northern tier of Sections could be made productive. Much of the valley could be irrigated with little Expense by ditching from Lake Fork which carries a large volume of water the year around & has a rapid descent.

The alluvial lands bording on these streams (one from the S. W. & the other from the N. W.) could be cultivated without irrigation.

It is probably the most desirable Township which has been surveyed thus far.
