## T. 29 S., R. 15 W.

The survey of T. 29 S., R. 15 W., Salt Lake Meridian, Utah, was commenced July 20, 1938, and executed by Andrew Nelson, Surveyor, using Buff and Buff solar transit No. 16726, property of the General Land Office. The horizontal limb has a diameter of 4½ inches, with two double verniers placed opposite to each other and reading to single minutes; the vertical circle has a diameter of 4 inches with one double vernier reading to single minutes of arc. The instrument is equipped with the improved Smith solar attachment; radius of latitude arc 2½ inches, and of declination arc 3½ inches, each with verniers reading to single minutes of arc. The instrument was in good condition, and having been placed in satisfactory adjustment prior to the beginning of the survey, and tested and found free from appreciable error, was approved by the district cadastral engineer on April 20, 1938, in assignment instructions. I examined all the instrumental adjustments before making the field tests hereinafter recorded.

The solar attachment was not used on this survey; all azimuth determinations were accomplished by observations made upon Polaris; the bearings computed from deflection angles, and the lines carried forward by double fore and back sights. Several observations were made upon Polaris during the progress of this survey.

The measurements were made with a Lallie steel ribbon tape 8 chains in length, 1/8 inch in width, graduated every link for the first 100 links, and the balance at intervals of 10 links. The tape was tested by comparison with a Lufkin steel standard tape 1 chain in length and found correct. The measurements were made on the slope, and the vertical angle of each interval was ascertained by large improved clinometers, two to each tape, in good adjustment; the horizontal equivalents are entered in the note record.

The geographic position of the southeast corner of the township is approximately as follows: latitude 38°14'N.; longitude 113°28'W.

---

DEPENDENT RESURVEY OF SOUTH BOUNDARY

T. 28 S., R. 15 W.

Reestablishment of ~~Dependent Resurvey~~, ~~superseding~~ the survey executed by Henry Fitzhugh, Deputy Surveyor, in 1882.

October 3, 1938: At the closing corner of sections 1 and 2, on N. boundary of T. 29 S., R. 15 W., in approximate latitude 38°19'N.; longitude 113°29'W., I make an hour angle observation upon Polaris west of the meridian, two each with the telescope in direct and reversed positions, reading the horizontal deflection angle from star W. to a signal flag on skyline on top of mountain about 5 miles distant. Watch time of observation is 8h 26m 23s a.m., and is 10 seconds slow of 105th meridian standard time, comparison being made this day with naval observatory time signals heard over radio station K S L.

Local mean time of observation - - - - 7h 52.6m a.m.
Mean horizontal angle star W. to reference, - - - - - - - - - - - - - - - - 88° 46.4'
Azimuth of Polaris at observation - - - 1°16'
True bearing of reference flag - - - - S.89°57.6'W.

Beginning at the corner of Ts. 28 S., Rs. 14 and 15 W.,

U. S. GOVERNMENT PRINTING OFFICE 0—8155

DEPENDENT RESURVEY
SOUTH BOUNDARY OF T. 28 S., R. 15 W.

Chains

an iron post, 3 ins. diameter, properly set, marked and witnessed as described in the survey of T. 29 S., R. 14 W., this Group.
Note: The closing corner of Ts. 29 S., Rs. 14 and 15 W., bears East 7.27 chains distant.

Thence

N.89°32'W., on resurvey line, along S. boundary of section 36.

Over rolling and broken land, through medium dense cedar and pinon timber, and scattering sagebrush; ascend E. slope 50 ft.

4.00 Low bench spur, slopes NE.; thence over land facing N. to NE.; descend 90 ft.

14.20 Flat swale, drains N.20°E.; ascend 60 ft. along N. slope.

27.00 Small, rocky rise, from S., extends N. 1½ chains to end; descend 30 ft.

31.00 Shallow swale, drains N.20°E.; gently ascend NE. slope.

32.56 Point midway between the closing corner of Ts. 29 S., Rs. 14 and 15 W., and the closing corner of sections 1 and 2.

Set an iron post, 3 ft. long, 1 in. diameter, 26 ins. in the ground, for ¼ section corner, on N. boundary of section 1, with brass cap marked

¼ S1
1938

from which

A cedar, 8 ins. diameter, bears S.15°E., 41 links distant, marked ¼ S1 BT

A cedar, 9 ins. diameter, bears S.27°W., 51 links distant, marked ¼ S1 BT

39.92 Intersect the original ¼ section corner, a porphyry stone, 22x11x4 ins., loosely set in the ground, dimly marked ¼ on N. face; from which original bearing trees:

A cedar, 10 ins. diameter, bears N.51°W., 19 links distant, marked ¼ S BT

A cedar, 10 ins. diameter, bears S.82°E., 19 links distant, marked ¼ S BT (I destroy marks on this tree.)

At corner point.

Set an iron post, 3 ft. long, 1 in. diameter, 24 ins. in the ground, with corner stone alongside, for ¼ section corner for section 36 only, with brass cap marked

¼ S 36
1938

from which

I mark additional bearing tree

A cedar, 12 ins. diameter, bears N.45½°E., 47 links distant, marked ¼ S36 BT

SUBDIVISION OF T. 29 S., R. 15 W.

Chains

N.0°01'W., between sections 10 and 11.

Over rolling land, with general E. to NE. exposures, through scattering timber and short undergrowth; slight ascent over S. slope to

1.40 High point on spur from W., slopes NE.; descend steep N. slope; entering medium dense timber, 240 ft.

12.70 Draw, drains NE.; thence over rolling E. slope.

20.10 Ravine, 40 ft. deep, near head, drains E.

26.40 Ravine, 20 ft. deep, drains N.60°E.

36.70 Ravine, 25 ft. deep, drains N.70°E.

40.00 On E. slope, 280 ft. below section corner.

Set an iron post, 3 ft. long, 1 in. diameter, 16 ins. in the ground to rock, and supported in a mound of stone to top, for ¼ section corner, with brass cap marked

¼
S10 | S11
1938

from which

A cedar, 5 ins. diameter, bears N.73½°E., 112 links distant, marked ¼ S11 BT

A pinon, 4 ins. diameter, bears S.5½°W., 316 links distant, marked ¼ S10 BT

46.10 Shallow depression on E. slope, drains E.; ascend SE. slope.

56.20 High, rocky spur, 200 ft. above ¼ section corner, slopes NE.; descend steep NW. slope.

62.90 Slope changes to a steep N. slope, bears NE. and SW.

70.00 Base of steep slope in S. edge of hollow, 410 ft. below spur, bears NE. and SW.; slight descent across bottom

74.90 Wash, 10 links wide, 1 ft. deep, drains NE.

80.00 On gentle N. slope, 450 ft. below spur.

Set an iron post, 3 ft. long, 2 ins. diameter, 27 ins. in the ground, for corner of secs. 2, 3, 10, and 11, with brass cap marked

## SUBDIVISION OF T. 29 S., R. 15 W.

Chains

**Land, rolling and rolling mountains; general S. to SE. exposure and drainage.**
**Soil, gravelly and stony clay; 3rd rate.**
**Timber, cedar and pinon.**
**Undergrowth, sagebrush and yellowtop.**
**Fair grazing land.**

---

S.89°58'E., on random line, between sections 16 and 21.

40.00 Set temporary ¼ section corner.

80.00 Intersect the corner of sections 15, 16, 21 and 22.

Thence

N.89°58'W., on true line, between sections 16 and 21.

Over rolling, mountainous land, through scattering timber and short undergrowth; descend NW. slope 10 ft.

2.10 A main draw, drains NE.; ascend E. slope 90 ft.

11.00 Low rise, slopes NE.; thence over rolling N. slope.

15.00 Head of small draw, drains NE.; ascend.

18.00 Low spur, slopes SE.; continue gradual ascent over rolling S. slope.

40.00 On rocky S. slope at top of ascent, 225 ft. above main draw.

Set an iron post, 3 ft. long, 1 in. diameter, 24 ins. in the ground to rock, and supported in a large mound of stone to top, for ¼ section corner, with brass cap marked

¼ S 16 / S 21 / 1938

from which

A pinon, 10 ins. diameter, bears N.20°W., 50 links distant, marked ¼ S16 BT

A cedar, 6 ins. diameter, bears S.40½°E., 111 links distant, marked ¼ S21 BT

Note: Center of wide, low pass bears S.5°W., about ¼ mile distant.

Gradually descend rolling S. slope 35 ft.

43.80 Small draw, heads N. about 8 chains distant, drains S.80°E.

51.30 Low rise, forming divide ridge, between drainage into Willow Creek and Blawn Wash, 25 ft. above draw, bears N., and descends to low pass; continue slight ascent over rolling S. slope.

67.00 Wide hollow, drains S.70°E.; ascend NE. slope 150 ft. to corner.

78.00 Leave scattering, enter dense timber, bears N.80°W. and S.80°E.

80.00 The corner of sections 16, 17, 20 and 21, 175 ft. above

| Chains | |
|---|---|

GENERAL DESCRIPTION

Chains

portion.

The township is fairly well watered, sufficient for grazing purposes. A permanent spring of good water is located in SW¼ NE¼ of section 28. It is in the bottom of a main drainage wash known as Blawn Wash. Below this spring is an intermittent stream to about the west side of section 35, where it sinks. A very small seep shows up in this wash, in SE¼ SE¼ of section 20, and is opposite an old abandoned log cabin in the NE¼ NE section 29. Willow Creek drains easterly through the north-central part, and enters the township in section 7, and leaves near the NE corner of section 1. It carries a small intermittent stream in section 7, and parts of section 4 and 3, and from the NE¼ SE¼ of section 2, where metal watering troughs are located, to about the east boundary of section 1, where it sinks. Quartz Creek drains easterly through sections 6, 5, 4, and the NW. part of section 3. It carries a very small intermittent stream, which heads in section 5. Small seeps are located in the SW¼ SW¼ of section 31, and in the NW¼ NW¼ of section 18.

In the S½ of section 4, on Willow Creek, is an old abandoned ranch known as Bucket Ranch, consisting of an old dilapidated cabin and sheds. About 40 acres of land, which has been under cultivation, and fencing, extends along the creek bottom for about three-fourths of a mile. Stock corrals are located in the SW¼ SW¼, of section 1, and SW¼ SW¼ section 27.

There are several unimproved roads extending into the township from the valleys to the east, but none cross the Wah Wah range in this township.

There are no settlers living in the township. No indications of coal or oil were noted, and the only indications of mineral were iron outcrops in sections 20, 30 and 31.

The nearest postoffices are Lund, Utah, about twelve miles southerly, and Milford, Utah, about thirty miles northeasterly.

No magnetic declination recorded on account of defective needle.

## CERTIFICATE OF SURVEYOR

I, Andrew Nelson, Surveyor, HEREBY CERTIFY upon honor that, in pursuance of special instructions bearing date of the 29th day of July, 1936, supplemental received from the district cadastral engineer for Utah, with assignment instructions dated April 20, 1938, I have ~~surveyed~~ dependently resurveyed the south boundary of T.28 S., R.15 W., and surveyed the subdivision of T.29 S., R.15 W.,

of the Salt Lake Meridian, in the State of Utah, which are represented in the foregoing field notes as having been executed by me and under my direction; and that said survey has been made in strict conformity with said instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in the specific manner described in the foregoing field notes.

March 7, 1940.

Salt Lake City, Utah.

Andrew Nelson
Surveyor.

## CERTIFICATE OF APPROVAL

OFFICE OF SUPERVISOR OF SURVEYS,

Denver, Colo., October 15, 1943.

The foregoing field notes of the ~~survey of~~ dependent resurvey of the south boundary of T.28 S., R.15 W., and the survey of the subdivision of T.29 S., R.15 W., Salt Lake Meridian, Utah,

executed by Andrew Nelson, Surveyor,

under special instructions dated July 29, 1936, supplemental and assignment instructions dated April 20, 1938, having been critically examined, and the necessary corrections made prior to their certification by the engineer, the said field notes, and the survey therein described, are hereby approved.

Supervisor of Surveys.

## CERTIFICATE OF TRANSCRIPT

I CERTIFY ~~that~~ the foregoing transcript of the field notes of the above-described ~~surveys in~~ _____, is a true ~~copy of the original~~ field notes on file in the public survey office.

## T. 29 S., R. 16 W.

The survey of T. 29 S., R. 16 W., Salt Lake Meridian, Utah, was commenced July 14, 1938, and executed by Andrew Nelson, Surveyor, using Buff and Buff solar transit No. 16726, property of the General Land Office. The horizontal circle has a diameter of 4½ inches, with two double verniers placed opposite to each other and reading to single minutes; the vertical circle has a diameter of 4 inches, with one double vernier reading to single minutes of arc. The instrument is equipped with the improved Smith solar attachment; radius of latitude arc 2½ inches, and of declination arc 3½ inches, each with verniers reading to single minutes of arc. The instrument was in good condition, and having been placed in satisfactory adjustment prior to the beginning of the survey, and tested and found free from appreciable error, was approved by the district cadastral engineer on April 20, 1938, in assignment instructions. I examined all the instrumental adjustments before making the field tests hereinafter recorded.

The solar attachment was not used on this survey; all azimuth determinations were accomplished by observations made upon Polaris; the bearings computed from deflection angles, and the lines carried forward by double fore and back sights. Several observations were made upon Polaris during the progress of this survey.

The measurements were made with a Lallie steel ribbon tape, 8 chains in length, 1/8 inch in width, graduated every link for the first 100 links, and the balance at intervals of 10 links. The tape was tested by comparison with a Lufkin steel standard and found correct. The measurements were made on the slope, and the vertical angle of each interval was ascertained by large improved clinometers, two to each tape, in good adjustment; the horizontal equivalents are entered in the field note record.

The geographic position of the southeast corner of the township is approximately as follows: latitude 38°14'N., longitude 113°35'W.

---

## INDEPENDENT RESURVEY OF EAST BOUNDARY OF T. 29 S., R. 16 W.

Independent Resurvey, superseding the Survey executed by T. C. Bailey, Deputy Surveyor, in 1882.

May 26, 1938: At the corner of townships 29 and 30 south, ranges 15 and 16 west, established by me this day in the survey of the north boundary of T. 30 S., R. 15 W., in approximate latitude 38°14'N., longitude 113°35'W.; I make an hour angle observation upon Polaris west of the meridian, two each with the telescope in direct and reversed positions reading the horizontal deflection angle from star E. to center of dead tree on skyline about 1½ miles distant. Watch time of observation is 2h 06.0m p. m., and is 22s slow of 105th meridian standard time, comparison being made this day with naval observatory time signals heard over radio station K S L.

Local mean time of observation - - - - - - 1h 32.0m p.m.
Mean horizontal angle star E. to reference 1° 07.5'.
Azimuth of Polaris at observation - - - - 1° 10.3'
True bearing of reference tree - - - - - - N.0°02.8'W.

July 14th: From the corner of Ts. 29 and 30 S., Rs. 15 and 16 W., which is an iron post, 3 ins. diam., marked and witnessed as described in the survey of T. 30 S., R. 15 W., this group.

Land, rough mountainous; general easterly exposure and drainage.
Soil, rocky of quartzite and limestone formations, with shallow gravelly clay; 4th rate.
Timber, cedar, pinon, mahogany, and few yellow pines.
Undergrowth, sage, service, bitter brush and manzanita.
Fair grazing land.

## DEPENDENT RESURVEY OF SOUTH BOUNDARY, T. 28 S., R. 16 W.

Dependent Resurvey, Reestablishment of the survey executed By T. C. Bailey, Deputy Surveyor, in 1882.

August 14, 1938: At the corner of Ts. 28 and 29 S., R. 16 W., in approximate latitude 38°19'N., longitude 113° 41'W., I make an hour angle observation upon Polaris east of the meridian, two each with the telescope in direct and reversed positions, reading the horizontal deflection angle from star E. to a definite V in rock on skyline, about twenty miles distant. Watch time of observation is 6h 49m 27s p.m., and is 1m 20s fast of 105th meridian time, comparison being made this day with naval observatory time signals heard over radio station K S L.

Local mean time of observation - - - - - - 6h 13m 23s P.M.
Mean horizontal angle star E to reference 9° 10.2'
Azimuth of Polaris at observation - - - - 0° 39.6'
True bearing of reference - - - - - - - - N9° 49.8'E.

The corner of Ts. 28 and 29 S., R. 16 W., is a quartzite stone, 12x8x6 ins., firmly set in a mound of stone, and dimly marked with 6 notches on S. edge.

At corner point

Set an iron post, 3 ft. long, 3 ins. diam., 27 ins. in the ground, with original stone corner, and a quart of

CC
1938

from which

A mahogany, 14 ins. diam., bears S.10½°E. 28 links distant, marked T29S R16W S1 CC BT

A fir, 6 ins. diam., bears S.79¼°W., 33 links distant, marked T29S R16W S2 CC BT

From this point, N.89°58'W., 9.45 chains distant, is the true restored point for corner of sections 35 and 36, T. 28 S., R. 16 W. The witness corner to same bears N.89° 58'W., 8.05 chains distant, an iron post, hereinbefore described in resurvey of N. boundary.

Land, rough, mountainous; southern portion drains into Willow Creek, and northern portion drains towards Pine Creek.
Soil, rocky, 4th rate; quartzite, limestone and porphyry formations.
Timber, cedar, pinon, mahogany, with few yellow pine and fir.
Undergrowth, sage, service and buck brush.
Fair grazing land.

---

From the corner of sections 2, 3, 34, and 35, on S. boundary of township, an iron post, 2 ins. diam., established by me, and described in survey of T. 30 S., R. 16 W. this group.

Thence

N.0°01'W., between sections 34 and 35.

---

GENERAL DESCRIPTION.

The greater portion of this township is high, rough, mountainous in character, lying in the Wah Wah Range, the divide of which enters the township at the northeast corner and extends southwesterly to the NW¼ section 11, thence southeasterly to east boundary, near the NE. corner section 13, thence southerly, crossing and recrossing the east boundary of township. A low pass in this divide is located in NE¼ section 13. Numerous high, rocky peaks are scattered throughout the mountains, one of the highest being located in the NW¼SE¼ of section 15. From the divide the land drains easterly towards the Wah Wah Valley, and westerly and southwesterly into Pine Valley, which occupies the extreme westerly and southwesterly portion of township.

All of the mountainous and east edge of the valley land is covered with a medium growth of juniper, pinon, and mountain mahogany. Some scattering yellow pine is found throughout the high country. Scattering undergrowth of sagebrush, service brush and browse prevails throughout the mountainous region, while sage and yellow top is found on the desert portion.

The soil is principally rocky, of limestone and quartzite formations, with shallow gravelly clay, 4th rate in the mountains, and a coarse gravel and sandy clay on the valley, 2nd to 3rd rate.

Willow Creek, a stream of good water, from about 3 to 5 links in width, heads at a spring, located in SW¼SE¼, section 2, flows southeasterly through sections 2, 11, and 12, leaving the township near the ¼ section corner of sec-

tions 7 and 12 on E. boundary. A spring of good water heads in NW¼SE¼, section 16, flows southwesterly through what is locally known as "Water Hollow", to a small pond or reservoir located in SE¼SW¼, section 16. A small ditch has been constructed from this pond to a second small reservoir in SW¼NW¼, section 20, thence continuing southwesterly to a third reservoir located just outside this township in section 25. At the time of this survey, July and August, the water did not reach much beyond the first reservoir. A small stream, about 2 to 3 links in width, heads in SE¼SW¼, section 10, flows westerly in bottom of deep canyon for approximately 1 mile distant before sinking. A small spring is located in NW¼SW¼, section 14, in bottom of draw, flows southeasterly for about 15 chains distant. Other small seeps were noted as follows: SE¼SE¼, section 1; NW¼SE¼, section 12, and NW¼SW¼, section 13.

The only improvements in this township are several unimproved roads along the west base of the mountains in Pine Valley. Dim trace of old unused road between Milford, Utah, and Pioche, Nevada, traverses through the south central portion in a NE. and SW. direction. A lumber shed, owned by H. D. Bailes, is located in NW¼ section 20.

The township is suitable for grazing of cattle and sheep. There are no settlers in the township.

There are two patented mining claims located in sections 2 and 3.

Lund, Utah, is the nearest postoffice and railroad point, about 25 miles to the southeast.

No indications of any commercial deposits of mineral were noted within the township, except a small deposit of fluorspar being prospected at time of survey, and located in NE¼NE¼ section 36.

No magnetic declination recorded on account of a defective needle.

## CERTIFICATE OF SURVEYOR

176

I, Andrew Nelson, Surveyor, HEREBY CERTIFY upon honor that, in pursuance of special instructions bearing date of the 29 day of July, 19[illegible], received from the district cadastral engineer for Utah, with assignment instructions dated April 20, 1938, I have ~~surveyed~~ resurveyed the south boundary of T.28 S., R. 16 W; resurveyed the east boundary and surveyed the subdivision of T.29 S., R.16 W.

of the Salt Lake Meridian, in the State of Utah, which are represented in the foregoing field notes as having been executed by me and under my direction; and that said survey has been made in strict conformity with said instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in the specific manner described in the foregoing field notes.

Jan. 29, 1940. Andrew Nelson

Salt Lake City, Utah. Surveyor.

## CERTIFICATE OF APPROVAL

OFFICE OF SUPERVISOR OF SURVEYS,

Denver, Colo., Oct. 15, 1943.

The foregoing field notes of the ~~survey of~~ resurvey of the south boundary of T.28 S., R.16 W; resurvey of the east boundary and survey of the subdivision of T.29 S., R.16 W.

executed by Andrew Nelson, Surveyor, under special instructions dated July 29, 1936, and assignment instructions dated April 20, 1938, having been critically examined, and the necessary corrections made prior to their certification by the engineer, the said field notes, and the survey therein described, are hereby approved.

Supervisor of Surveys.

## CERTIFICATE OF TRANSCRIPT

I CERTIFY ~~that~~ the foregoing transcript of the field notes of the above-described surveys in [illegible], is a true ~~copy of the original~~ field notes on file in the public survey office.

## TOWNSHIP 30 SOUTH, RANGE 15 WEST.

The survey of T. 30 S., R. 15 W., Salt Lake Meridian, Utah, was commenced May 20, 1937, and executed by Elliot Bird, Surveyor, and Transitmen Edward Eliason, Molen Roper, and Kalvin Winwood; they used the following instruments: Buff & Buff transit No. 18003 and No. 16725, Young & Sons transit No. 8581, and K. & E. transit No. 20576. The survey of this township was discontinued on May 25, 1937. On May 4, 1938, the survey was resumed by Andrew Nelson, Surveyor, who used Buff & Buff transit No. 16726 to complete the survey.

All instruments are the property of the General Land Office. Except the K. & E. transit, all instruments are equipped with Smith solar attachment. All instruments have full vertical circles, and the horizontal limbs are provided with two double verniers placed opposite to each other and reading to single minutes of arc, which is also the least count of the verniers of the vertical circles. The instruments were approved for use on this survey, conditional upon satisfactory field tests, by the district cadastral engineer for Utah, in supplemental assignment instructions dated April 1, 1937, and April 20, 1938.

During the progress of this survey the solar attachments were not used, and all azimuths in this record are referred to true meridians determined by observations on Polaris by the method of deflection angles and calculated courses, and the lines of the survey were projected by fore and back sights. The instruments were in good condition and adjustments during the progress of the survey. Numerous observations were made upon Polaris, on line, during the survey.

The measurements were made with Lallie steel ribbon tapes 5 and 8 chains in length, 1/8 inch in width, graduated every link for the first 100 links, and the balance at intervals of 10 links. The tapes were tested by comparison with a Lufkin steel standard tape, 1 chain in length, and found correct. The measurements were made on the slope, and the vertical angle of each interval was ascertained by large improved clinometers, two to each tape, in good adjustment. The horizontal equivalents are entered in the field note record.

The geographic position of the southeast corner of the township is approximately latitude 38°09'N.; longitude 113°28'W.

---

## INDEPENDENT RESURVEY OF WEST BOUNDARY OF T. 30 S., R. 15 W.

Independent Resurvey Superseding the Survey executed by T. C. Bailey, Deputy Surveyor, in 1882.

May 11, 1938: At the standard corner of Ts. 30 S., Rs. 15 and 16 W., on the Sixth Standard Parallel South, in approximate latitude 38°09'W.; longitude 113°35'W.; with transit No. 16726, I make an hour angle observation upon Polaris east of the meridian, making four observations, two each with the telescope in direct and reversed positions, reading the horizontal deflection angle from star to a definite point on skyline about seven miles distant. Watch time of observation is 8h 15m 53s a.m., and is 6s fast of correct 105th meridian standard time, comparison being made this day with naval observatory time signals heard over radio station K.S.L.

Local mean time of observation - - - - - 7h 41m 27s a.m.
Mean horizontal angle star to reference 0° 53.3'W.
Azimuth of Polaris at observation - - - 0° 52.3
True bearing of reference point - - - - N.0° 01'W.

INDEPENDENT RESURVEY OF WEST BOUNDARY OF

A pinon, 10 ins. diam., bears N.43½°W., 19 lks. dist., marked T29S R16W S36 BT

Corner stands on an abrupt rocky NE. slope.

From this corner, N.38°09'W., 13.74 chs. dist. I find the original corner of the above townships as established by T. C. Bailey in 1882, a limestone, 14x8x6 ins., properly marked and witnessed as described in the official record. Destroy corner by defacing the marks on stone and the two remaining bearing trees.
N.38°W. about 16 chs. dist. to junction of canyons;
N.4¼°E. about 30 chs. dist. to top of rocky hill;
N.36½°W. about 5 miles dist. to high peak.
N.82°20'W. to Indian Peak, in R. 18 W.
N.75°E. about 10 chs. dist. to head of a wet weather seep in small draw, draining NW.

Land, mountainous; drainage SW.
Soil, rocky with shallow clay; 4th rate.
Timber, cedar and pinon, with few scattered fir and yellow pines.
Undergrowth, sage, yellowtop and service.
Fair grazing land.

INDEPENDENT RESURVEY OF NORTH BOUNDARY,
T. 30 S., R. 15 W.

Superseding the survey executed
by T. C. Bailey, Deputy Surveyor, in 1882.

May 18, 1938: At the corner of townships 29 and 30 south, ranges 14 and 15 west, in approximate latitude 38°14'N.; longitude 113°28'W.; with transit No. 16726, I make an hour angle observation upon Polaris east of the meridian, two each with the telescope in direct and reversed positions, reading the horizontal deflection angle from star, W. to a definite reference point on skyline about 5 miles distant. Watch time of observation is 8h 49m 46s a.m., and is 12s slow of correct 105th meridian standard time, comparison being made this day with naval observatory time signals heard over radio station K.S.L.

Local mean time of observation - - - - - - 8h 16m 06s a.m.
Mean horizontal angle star, W. to reference 0° 35.6'
Azimuth of Polaris at observation - - - - 0° 34.3'
True bearing reference point - - - - - - - N.0°01.3'W.

Thence from the corner of Ts. 29 and 30 S., Rs. 14 and 15 W., which is an iron post, 3 ins. diam., properly set, marked and witnessed by four bearing trees, as described in record of survey of T. 30 S., R. 14 W., of this group.

SURVEY OF SUBDIVISION, T. 30 S., R. 15 W.

May 21, 1937: At the standard corner of sections 35 and 36, on the Sixth Standard Parallel South, (S. boundary), in approximate latitude 38°09'N.; longitude 115°29'W.; with transit No. 18005, I make an hour angle observation upon Polaris, east of the meridian, making four observations, two each with the telescope in direct and reversed positions, reading the horizontal deflection angle from Polaris W. to a flag N. about 3/4 mile distant. Watch time of observation is 7h 58m 30s a.m., and carries correct 105th Meridian standard time, as compared with time signals over radio station K.S.L. this day.

Local mean time of observation - - - - - - 7h 24.6m a. m.
Mean horizontal angle star to reference - 0°47'
Azimuth of Polaris E. of meridian - - - - 0°46'.
True bearing of flag - - - - - - - - - - - N.0°01'W.

The standard corner of secs. 35 and 36, on S. bdy. of tp. is an iron post, 3 ins. diam., firmly set, properly marked and witnessed as described in the official record.

Thence

N.0°01'W., bet. secs. 35 and 36.

Over rolling land, with gentle easterly exposure, through medium dense cedar and pinon timber, and scattering short undergrowth; gentle ascent over rolling SE. slope.

9.30 Wash, 20 lks. wide, 1½ ft. deep, drains S.70°E.

25.10 Wash, 30 lks. wide, 4 ft. deep, drains S.80°E.

40.00 On gradual E. slope.

Set an iron post, 3 ft. long, 1 in. diam., 27 ins. in the ground, for ¼ sec. cor., with brass cap marked

¼
S35 | S36
1937

from which

A cedar, 5 ins. diam., bears S.61½°E., 15 lks. dist., marked ¼ S36 BT

A cedar, 7 ins. diam., bears S.36°W., 27 lks. dist., marked ¼ S35 BT

Continue over low rolling E. slope.

47.80 Wash, 70 lks. wide, 2 ft. deep, drains S.80°E.

55.10 Wash, 25 lks. wide, 1 ft. deep, drains E.

64.00 Small spur, slopes E.

72.60 Wash, 20 lks. wide, 2 ft. deep, drains S.80°E.

80.00 On a gradual SE. slope.

## GENERAL DESCRIPTION

The land embraced within T. 30 S., R. 15 W., Salt Lake Meridian, Utah, is principally rolling, hilly and rolling mountainous, with elevation of approximately 6000 to 7500 feet above sea level. The divide ridge, at the approximate southern end of the Wah Wah range of mountains, enters the township on the north boundary of section 6, where it breaks off into rolling hills. The divide has a southerly bearing for about 4 miles, thence turns southeasterly leaving the township near the standard corner of sections 33 and 34 on south boundary. In sections 7 and 8 are three high, rough peaks locally known as "The Tetons". The greater portion of the township has a general southeasterly exposure and drainage towards the Escalante Desert. The southwest corner of the township drains southwesterly towards the Escalante Desert via Mountain Spring. Portions of sections 6, 7, and 18, have a westerly exposure and drainage into Pine Valley.

Nearly the entire township is covered with a medium dense to dense growth of scrub cedar (juniper) and pinon pine timber of value only for firewood and fence posts.

The principal undergrowth is sagebrush, yellowtop and sparse grass.

The soil is principally a sandy to gravelly and rocky clay, and can be classed as third rate, except on the steep mountainous slopes, where it is mainly rocky in form of outcrops, ledges, sliderock and surface rock, and fourth rate. The formation is mainly limestone.

The only water found within this township is located as follows: a very small seep of fair water, which probably dries up in late summer, in the NW¼ NE¼, section 18. "Jockey Spring", a very small seep of poor water, suitable only for stock purposes, located in the bottom of a main drainage wash, in the SW¼ SE¼, section 21. This seep dries up in late summer. Small intermittent seeps of poor water in bottom of wash, head in SE¼ NE¼, section 9, and extends through the SW¼, section 10.

Several unimproved roads extend through the township. A road from Lund, Utah, situated about 12 miles in a southerly direction, enters the township in section 36, and bears westerly via Jockey Spring, leaving the township on the west boundary of section 19. This road leads to points in Pine Valley and to a small mine in section 36, T. 29 S., R. 16 W.

A small reservoir, recently constructed by the CCC, is located in the NE¼ NE¼, section 28. An old abandoned log cabin is located in the SW¼ SE¼, section 21.

The lands within this townships are suitable only for grazing purposes. Iron outcrops have been found and prospected near the center of section 28. No indications of other mineral, coal, oil or oil shale were noted in this township.

There are no settlers living in the township.

No magnetic declination was recorded on account of a defective needle.

# CERTIFICATE OF ~~UNITED STATES~~ SURVEYOR

Andrew Nelson, Elliot Bird, Surveyors, and
I, We, Edward Eliason, Molen Roper, and Kelvin Winwood, Transitmen, HEREBY CERTIFY upon honor that, in pursuance of special instructions bearing date of the 29th day of July 1936 received from the district cadastral engineer for Utah, with assignment instructions dated ~~April 20, 1938~~ April 1, 1937 We have surveyed the north and west boundaries and subdivisional lines of T. 30 S., R. 15 W.

of the Salt Lake Meridian, in the State of Utah, which are represented in the foregoing field notes as having been executed by ~~me~~ us and under ~~my~~ our direction; and that said survey has been made in strict conformity with said instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in the specific manner described in the foregoing field notes.

Salt Lake City, Utah
Feb. 11, 1939.

## CERTIFICATE OF APPROVAL

OFFICE OF ~~U.S.~~ SUPERVISOR OF SURVEYS,

Denver, Colo., Oct. 15, 1943.

The foregoing field notes of the survey of **the north and west boundaries, and subdivisional lines of T. 30 S., R. 15 W., S. L. M., Utah.**

executed by Andrew Nelson and Elliot Bird, Surveyors, and Edward Eliason, Molen Roper, and Kelvin Winwood, Transitmen, under special instructions dated July 29, 1936, and assignment instructions dated April 1, 1937 & April 20, 1938, having been critically examined, and the necessary corrections made prior to their certification by the engineer, the said field notes, and the survey therein described, are hereby approved.

*U.S. Supervisor of Surveys.*

## CERTIFICATE OF TRANSCRIPT

~~I CERTIFY that the foregoing transcript of the field notes of the above described surveys in ..... is a true copy of the original field notes on file in the public survey office.~~

## T. 30 S., R. 16 W.

The survey of T. 30 S., R. 16 W., Salt Lake Meridian, Utah, was commenced June 13, 1938, and executed by Andrew Nelson, Surveyor, using Buff and Buff solar transit No. 16726, property of the General Land Office. The horizontal circle has a diameter of 4½ ins. with two double verniers placed opposite to each other and reading to single minutes; the vertical circle has a diameter of 4 ins. with one double vernier reading to single minutes of arc. The instrument is equipped with the improved Smith solar attachment; radius of latitude arc 2½ ins., and of the declination arc 3½ ins., each with verniers reading to single minutes of arc. The instrument was in good condition, and having been placed in satisfactory adjustment prior to the beginning of the survey, and tested and found free from appreciable error, was approved by the district cadastral engineer on April 20, 1938, in assignment instructions. I examined all the instrumental adjustments before making the field tests hereinafter recorded.

The solar attachment was not used on this survey; all azimuth determinations were accomplished by observations made upon Polaris; the bearings computed from deflection angles, and the lines carried forward by double fore and back sights. Several observations were made upon Polaris during the progress of this survey.

The measurements were made with a Lallie steel ribbon tape, 8 chains in length, 1/8 inch in width, graduated every link for the first 100 links, and the balance at intervals of 10 links. The tape was tested by comparison with a Lufkin steel standard and found correct. The measurements were made on the slope, and the vertical angle of each interval was ascertained by large improved clinometers, two to each tape, in good adjustment; the horizontal equivalents are entered in the field note record.

The geographic position of the southeast corner of the township is approximately as follows: latitude 38° 09'N.; longitude 113° 35'W.

---

### INDEPENDENT RESURVEY OF NORTH BOUNDARY

### OF T. 30 S., R. 16 W.

Independent Resurvey Superseding the Survey Executed

By T. C. Bailey, Deputy Surveyor, in 1882.

May 26, 1938: At the corner of townships 29 and 30 south, ranges 15 and 16 west, established by me this day in the survey of the N. boundary of T. 30 S., R. 15 W., in approximate latitude 38° 14'N., longitude 113° 35'W.; I make an hour angle observation upon Polaris west of the meridian, two each with the telescope in direct and reversed positions reading the horizontal deflection angle from star E. to center of dead tree on skyline about 1¼ miles distant. Watch time of observation is 2h 06.0m. p.m., and is 22s slow of 105th meridian standard time, comparison being made this day with naval observatory time signals heard over radio station K S L.

Local mean time of observation - - - - - - - 1h 32.0m p.m.
Mean horizontal angle star E. to reference - 1° 07.5'
Azimuth of Polaris at observation - - - - - 1° 10.3'
True bearing of reference tree - - - - - - - N.0° 02.8' W.

Thence from the corner of Ts. 29 and 30 S., Rs. 15 and 16 W., which is an iron post, 3 ins. diam., marked and witnessed as described in the survey of T. 30 S., R. 15 W., this group.

GENERAL DESCRIPTION

The major portion of T. 30 S., R. 16 W., Salt Lake Meridian, Utah, is located in the southern end of Pine Valley desert. The land is principally rolling, cut by numerous shallow swales and washes, with some low hilly land in the northeast corner. A low flat divide at the south end of Pine Valley extends across the southern portion of the township through sections 31, 32, 33, and 34, thence turns northeasterly to section 24. The land to the south of this divide drains southerly towards the Escalante Desert via Mountain Spring. To the north of the divide all the land has a general westerly or easterly exposure and drainage into the main drainage swale in the bottom of Pine Valley, which heads in section 33, and drains northwesterly, leaving the township about one-quarter mile east from the northwest corner.

Cedar and pinon pine timber, of value only for fence material and fuel, cover the approximate east half, and southwest corner of the township.

Undergrowth of sagebrush, yellowtop, white sage, and grass is found throughout the township.

The soil is principally a light sandy to gravelly clay, lying on clay or a hardpan, and can be classed as third rate.

The only water found in this township is a very small seep spring, located in the NW¼ SE¼, section 13, which is being used for watering of stock. A small reservoir recently constructed by the Division of Grazing is located in the south central part of section 13.

Numerous unimproved roads extend through this township. A road leading from Lund, Utah, about eighteen miles

southeasterly, via Jockey Spring, enters the township on the east boundary of section 24; another road from Lund, via Mountain Spring, enters on the south boundary of section 33. This road bears northwesterly, and follows the bottom of Pine Valley, leaving the township in section 6. A branch of this last road enters on the south boundary of section 34, and extends northerly, leaving on the north boundary of section 4.

The township is suitable only for grazing of sheep and cattle.

There are no settlers living in this township.

No indications of mineral, coal, oil or oil shale were noted.

No magnetic declination recorded on account of a defective needle.

## CERTIFICATE OF ~~UNITED STATES~~ SURVEYOR

I, Andrew Nelson, Surveyor, HEREBY CERTIFY upon honor that, in pursuance of special instructions bearing date of the 29th day of July, 1936, received from the district cadastral engineer for Utah, with supplemental instructions dated April 20, 1938, I have surveyed the North Boundary and Subdivisional lines of Township 30 South, Range 16 West,

of the Salt Lake Meridian, in the State of Utah, which are represented in the foregoing field notes as having been executed by me and under my direction; and that said survey has been made in strict conformity with said instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in the specific manner described in the foregoing field notes.

Salt Lake City, Utah
Mar. 15, 1939.

Andrew Nelson
Surveyor

## CERTIFICATE OF APPROVAL

OFFICE OF ~~U.S.~~ SUPERVISOR OF SURVEYS,
Denver, Colorado,
Oct. 15, 1943.

The foregoing field notes of the survey of the North Boundary and Subdivisional lines of Township 30 South, Range 16 West, Salt Lake Meridian, Utah,

executed by Andrew Nelson, Surveyor,

nder special instructions dated July 29, 1936, and supplemental assignment
structions dated April 20, 1938, having been critically examined, and
e necessary corrections made prior to their certification by the engineer, the said field notes, and the survey
erein described, are hereby approved.

Franklin L. Johnson
*U.S. Supervisor of Surveys.*

## CERTIFICATE OF TRANSCRIPT

~~I CERTIFY that the foregoing transcript of the field notes of the above-described surveys in ..... , is a true copy of the original field notes on file in the public survey office.~~

~~*U.S. Supervisor of Surveys.*~~

Township 35 South, Range 4½ West

The original survey of the subdivisional lines of the west range of sections in T. 35 S., R. 4½ W., Salt Lake Meridian, Utah, was executed by J. G. Burrill, Deputy Surveyor, in 1874, who likewise surveyed the south mile of the east boundary in 1876. The south boundary was surveyed by Elliot Bird, in 1925 under instructions providing for the survey of group 146, Utah. The following field notes are those of a dependent resurvey of the south mile of the east boundary, the east boundary of the west range of sections, and a survey of the balance of the east and north boundaries, and subdivision, completing the survey of T. 35 S., R. 4½ W.

The dependent resurvey is a restoration of the lines of the original survey in their true, original positions according to the identified evidence of that survey. Before reconstructing an identified original corner monument or restoring a missing corner, the lines of the original survey were retraced and searches made for the original corners and other calls of the field notes. After making the necessary retracements, the rules of proportionate measurement were applied in order to ascertain the position of each lost corner, and when duly identified or restored, the corners were remonumented with the regulation iron posts. In order to simplify the record, only the true line notes, refering to the completed resurvey are supplied here.

Field work was commenced July 7, 1948 and the survey was executed with Buff and Buff solar transit number 26594, the property of the Bureau of Land Management, and constructed in accordance with their standard specifications. The instrument was in good condition, and prior to the beginning of the field work, it was tested and found free from error. It was maintained in good adjustment during the survey. Since the bearings of the lines were determined by the use of the solar attachment, the indicated meridians obtained by its use were compared with the true meridian established by Polaris observations, and found to be in close agreement with it. The continued accuracy of the solar attachment was verified by frequent tests on this meridian. The geographic postion of the southeast corner of the township, computed through approved surveys from the U. S. Coast and Geodetic station at Sunset Point is as follows: Latitude 37°43'10" N. and longitude 112°16'30" W. Latitude observations made on line during the survey check this value for latitude.

The mean magnetic declination was found to be 16° E.

The measurements were made with Lallie steel ribbon tapes eight chains in length. These tapes are graduated every link for the first chain, and thereafter at intervals of ten links. The measurements were made on the slope, the vertical angle of each interval determined by the use of clinometers and the slope distances properly reduced to horizontal equivalents, which appear in this field note record.

General Description of Township 35 South, Range 4½ West.

The portion of T. 35 S., R. 4½ W., Salt Lake Meridian, Utah, that comes under this survey, consists of the broken west breaks of the Paunsagunt Plateau. The elevation of the township above sea level is about 8,000 feet along the east portion and 7,000 feet along the west portion. The breaks of this plateau in most places consist of colorful pink ledges and breaks which form spectacular amphitheaters or wide canyons filled with pinnacles and grotesque forms. The major portion of this

beauty is found along Casto and Red Canyons. Red Canyon drains northwesterly through the south portion of the township, and through this canyon Utah State Highway No. 12 passes. This highway leads to the main entrance to Bryce Canyon National Park which is located about ten miles to the southeast. In the NE¼ sec. 26, the highway passes through two short tunnels and in the NW¼ sec. 26 and the NE¼ sec. 27, a Forest Service public camping ground is maintained. Casto Canyon drains westerly through the north portion of the township and the beautiful scenery in this canyon is much greater than that in Red Canyon, but as no improved roads lead to this portion of the township, this canyon is very seldom visited.

The township is covered with a medium dense growth of juniper, pinon, pine, fir, and spruce timber. Most of the timber that has any commercial value has been removed. The undergrowth consists of a scattered growth of sage-brush, manzanita, weeds, and grass, which affords fair grazing for stock, and was being used for this purpose under the supervision of the Forest Service.

No settlers were living on the township at the time of the survey and no portions of it are suitable for farming. No indications of mineral were found.

The east three ranges of sections and sec. 33 of this township, are within the boundaries of the Powell National Forest.

3771 **CERTIFICATE OF CADASTRAL ENGINEER**

I, [illegible], Cadastral Engineer, HEREBY CERTIFY upon honor that pursuance of special instructions bearing date of the 14th day of May 19[illegible] I have surveyed independently resurveyed portions of the east boundary and subdivisio[illegible] resurveyed portions of the east and north boundaries and subdivision, completi[illegible] the survey of T. 35 S., R. 4 W.,

of the [illegible] Meridian, in the State of Utah, which represented in the foregoing field notes as having been executed by me and under my direction; and t said survey has been made in strict conformity with said instructions, the Manual of Instructions for Survey of the Public Lands of the United States, and in the specific manner described in the forego field notes.

[illegible]

[illegible]

Robert Gilgenast
Cadastral Engineer

## CERTIFICATE OF APPROVAL

BUREAU OF LAND MANAGEMENT,

*Washington, D. C.,* FEB 25 1953, *19*...

The foregoing field notes of the survey of independent resurvey of portions of the east [illegible] subdivision, and survey of portions of the east and north boundarie[illegible] [illegible], completing the survey of T. 35 S., R. 4 W., Salt Lake Meridian [illegible],

executed by [illegible], Cadastral Engineer

having been critically examined and found correct, are hereby approved.

Donald R. Clem
Assistant Chief, Division of Cadastral Engineering.

## CERTIFICATE OF TRANSCRIPT

I CERTIFY that the foregoing transcript of the field notes of the above-described surveys in [illegible], is a true copy of the original field notes.

Chief, Division of Cadastral Engineering.

T. 37 S., R. 14 W.

The survey of fractional T. 37 S., R. 14 W., Salt Lake Meridian, Utah, was commenced June 27th, 1939, and executed by Andrew Nelson, Surveyor, using Buff & Buff solar transit No. 16726, property of the General Land Office. The horizontal limb has a diameter of 4½ ins., with two double verniers placed opposite to each other and reading to single minutes; the vertical circle has a diameter of 4 ins. with one double vernier reading to single minutes of arc. The instrument is equipped with the improved Smith solar attachment; radius of latitude arc 2½ ins., and of declination arc 3½ ins., each with verniers reading to single minutes of arc. The instrument was in good condition, and having been placed in satisfactory adjustment prior to the beginning of the survey, and tested and found free from appreciable error, was approved by the district cadastral engineer on June 22, 1939, in assignment instructions. I examined all the instrumental adjustments before making the field tests hereinafter recorded.

The solar attachment was not used on this survey; all azimuth determinations were accomplished by observations made upon Polaris; the bearings computed from deflection angles, and the lines carried forward by double fore and back sights.

The measurements were made with a Lallie steel ribbon tape 8 chains in length, 1/8 inch in width, graduated every link for the first 100 links, and the balance at intervals of 10 links. The tape was tested by comparison with a Lufkin steel standard tape, 1 chain in length, and found correct. The measurements were made on the slope, and the vertical angle of each interval was ascertained by large improved clinometers, two to each tape, in good adjustment; the horizontal equivalents are entered in the note record.

The geographic position of the southeast corner of the township is approximately as follows: latitude 37° 32' N.; longitude 113° 22' W. as taken from most reliable maps.

---

DEPENDENT RESURVEY OF PORTION OF THE SUBDIVISIONAL LINES IN T. 37 S., R. 14 W., S. L. M.

Dependent resurvey reestablishment of the survey executed by A. J. Stewart, Jr., in 1873.

June 26, 1939: at the cor. of secs. 25, 30, 31, and 36, on the E. bdy. of the tp., in approximate lat. 37° 32' 45" N.; long. 113° 21' 45" W., I make an hour angle observation upon Polaris east of the meridian, two each with the telescope in direct and reversed positions, reading the horizontal deflection angle from star W. to a sharp rock point on skyline about 3 miles distant.

Watch time of observation is 8h 26m 50s p.m., and is 25s slow of 105th meridian standard time, comparison being made this day with naval observatory time signals heard over radio station K S L.

| | |
|---|---|
| Local mean time of observation | 7h 53m 48s p.m. |
| Mean horizontal angle star W. to reference | 88° 51.9' |
| Azimuth of Polaris at observation | 0° 9.6' |
| True bearing of reference point | N. 88° 42.3' W. |

June 27th; beginning at the cor. of secs. 25, 30, 31, and 36, on E. bdy. of tp.; an iron post, 2 ins. diam., properly set, marked and witnessed as described in record of resurvey and survey of T. 37 S., R. 13 W., under Group No. 243, Utah.

Thence

S. 88° 47' W., on resurvey line bet. secs. 25 and 36.

Over rolling mountainous land, through medium dense timber and undergrowth; descend rolling SW. slope.

Chains

Independent Resurvey of Portion of West Boundary of T. 37 S., R. 14 W.

Independent resurvey superseding the survey executed by T. C. Bailey, deputy surveyor, in 1881.

July 13, 1939; at the original cor. of secs. 19, 24, 25, and 30, on W. bdy. in approximate lat. 37° 33½' N.; long. 113° 28' 21" W., I make an hour angle observation upon Polaris east of the meridian, two each with the telescope in direct and reversed positions, reading the deflection angle from star E. to flag in mound of stone on high peak to NE. about 5¼ miles distant.

Watch time of observation is 8h 12m 9s p.m., and is 17 sec. slow of 105th meridian standard time, comparison being made this day with naval observatory time signals heard over radio station K S L.

Local mean time of observation . . . . . 7h 38m 30s p.m.
Mean horizontal angle star E. to reference. . . . . 70° 05.9'
Azimuth of Polaris at observation . . . . . 0° 26.3' E.
True bearing of reference point . . . . . N.70° 32.2' E.

The cor. of secs. 19, 24, 25, and 30, is a sandstone, 18x10x6 ins., firmly set in the ground and surrounded by few rocks, properly marked with 2 notches on S. and 4 notches on N. edges; at corner point

Set an iron post, 3 ft. long, 2 ins. diam., 27 ins. in the ground, with old corner stone deposited alongside, for cor. of secs. 19, 24, 25, and 30, with brass cap marked

---

GENERAL DESCRIPTION

The two portions of the present survey, completing the surveys of T. 37 S., R. 14 W., Salt Lake Meridian, consist of rolling to rough mountainous land, in general covered with a medium to dense growth of scrub cedar, pinon pine, and mountain mahogany timber, and medium dense undergrowth of sage, oak, and service brush. The lands are suitable only for grazing purposes.

The soil is principally rocky of granite and volcanic formations with shallow gravelly clay and can be classified as 3rd to 4th rates.

Small intermittent seeps along bottom of canyon in sec. 23, and small stream in Little Pinto Creek, which crosses the extreme NE. part of sec. 7 was the only water noted in areas under this survey.

The improved road between Cedar City and Pinto extends through NW. part of sec. 14. A graded road between New Harmony and Page's Ranch extends through extreme SE. part of sec. 25. An unimproved road between New Castle and Page's Ranch extends through northern part of sec. 7. Power line to Cedar City passes through SE. part of sec. 19 and NW. part of sec. 14.

Homestead Entry Survey No. 142 is located in SW. portion of sec.25. There are no settlers living in the newly surveyed portions of this township, nor were there any indications of mineral, coal or oil noted.

No magnetic declination was taken because of defective needle.

# CERTIFICATE OF SURVEYOR

I, Andrew Nelson, HEREBY CERTIFY upon honor that, in pursuance of special instructions bearing date of the 11th day of May, 1939, received from the district cadastral engineer for Utah, with assignment instructions dated June 22, 1939, I have made an independent and dependent resurvey of portion of west boundary, dependent resurvey and survey of portions of subdivisional lines, completing the survey of T. 37 S., R. 14 W.

of the Salt Lake Meridian, in the State of Utah, which are represented in the foregoing field notes as having been executed by me and under my direction; and that said survey has been made in strict conformity with said instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in the specific manner described in the foregoing field notes.

March 20, 1940 — Andrew Nelson

Salt Lake City, Utah — Surveyor

## CERTIFICATE OF APPROVAL

OFFICE OF SUPERVISOR OF SURVEYS,

Denver, Colorado, May 1, 1944.

The foregoing field notes of the independent and dependent resurvey of portion of west boundary, dependent resurvey and survey of portions of subdivisional lines, completing the survey of T. 37 S., R. 14 W., Salt Lake Meridian, Utah

executed by Andrew Nelson, Surveyor, under special instructions dated May 11, 1939, and assignment instructions dated June 22, 1939, having been critically examined, and the necessary corrections made prior to their certification by the engineer, the said field notes, and the survey therein described, are hereby approved.

Acting *Supervisor of Surveys.*

## CERTIFICATE OF TRANSCRIPT

I CERTIFY that the foregoing transcript of the field notes of the above-described surveys in ....., is a true copy of the original field notes on file in the public survey office.

T. 37 S., R. 15 W.

Chains

The survey of portions of T. 37 S., R. 15 W., Salt Lake Meridian, Utah, was commenced July 24, 1939, and executed by Andrew Nelson, Surveyor, using Buff and Buff solar transit No. 16726, property of the General Land Office. The horizontal limb has a diameter of 4½ inches, with two double verniers placed opposite to each other and reading to single minutes of arc; the vertical circle has a diameter of 4 inches, with one double vernier reading to single minutes of arc. The instrument is equipped with the improved Smith solar attachment; radius of latitude arc 2½ inches, and of declination arc 3½ inches, each with verniers reading to single minutes of arc. The instrument was in good condition, and having been placed in satisfactory adjustment prior to the beginning of the survey, and tested and found free from appreciable error, was approved by the district cadastral engineer on June 22, 1939, in assignment instructions. I examined all the instrumental adjustments before making the field tests hereinafter recorded.

The solar attachment was not used on this survey; all azimuth determinations were accomplished by observations made upon Polaris; the bearings of the lines computed from deflection angles, and the lines carried forward by double fore and back sights.

The measurements were made with a Lallie steel ribbon tape, eight chains in length, graduated every link for the first 100 links, and the balance at intervals of 10 links. The tape was tested by comparison with a Lufkin steel standard tape and found correct. The measurements were made on the slope, and the vertical angle of each interval was ascertained by large clinometers, two to each tape, in good adjustment; the horizontal equivalents are entered in the note record/. The geographic position of the SE. corner of the township is approximately as follows: latitude 37° 32' N., longitude 113° 28' W., as taken from the most reliable maps.

---

DEPENDENT RESURVEY OF PORTION OF EAST BOUNDARY T. 37 S., R. 16 W., OR PINE VALLEY GUIDE MERIDIAN, AS ORIGINALLY SURVEYED BY T.C. BAILEY, DEPUTY SURVEYOR, IN 1881, AND RESURVEYED IN 1911, BY GENTRY AND HEIST, UNDER GROUP No.14: ESTABLISHING NEW ¼ SECTION CORNERS FOR RANGE 15 W. ONLY.

There being no material discrepancy found in the topography along this boundary with that given in the resurvey by Gentry and Heist, none is given in this record.

Beginning at the original ¼ section corner on the E. boundary of section 25, T.37 S., R.16 W., as established in the Bailey survey, which is a granite stone, 8x6x4 ins., showing above ground, firmly set, marked ¼ on W. face, and witnessed by a small mound of stone to W.

Thence

N. 0°50' W., on resurvey line, along E. boundary of section 25.

21.86 Proportionate distance; point for the restored closing corner of secs. 30 and 31, T.37 S., R.15 W., described in resurvey of subdivisional lines.

38.86 Intersect the restored corner of sections 24 and 25, as established under the 1911 survey; an iron post, 3 ins. diameter, firmly set, properly marked and witnessed as described in the official record.

DEPENDENT RESURVEY OF E. BOUNDARY, T. 37 S., R. 16 W.

Chains

N. 0°40' E., on resurvey line, on E. bdy. of section 24.

19.98 Southing of 40.00 chains from the closing corner of sections 19 and 30.

Set an iron post, 3 ft. long, 1 in. diameter, 27 ins. in the ground, and surrounded with a mound of stone, for ¼ section corner, on W. boundary of section 30, T. 37 S., R. 15 W., with brass cap marked

¼
S30
1939

from which

A pinon, 7 ins. diameter, bears N.88°E., 82 lks. distant, marked ¼ S30 BT

Corner stands on steep N. slope in dense brush.

40.45 Intersect the restored ¼ section corner on E. boundary of section 24, established in the 1911 survey, an iron post 1 in diameter, firmly set, properly marked and witnessed as described in the official record.

Thence

N. 0°06' W., with continuous measurement.

59.98 Point for the closing corner of secs. 19 and 30, hereinafter described.

80.32 Intersect the corner of sections 13 and 24, T.37 S., R. 16 W.; an iron post, 3 ins. diameter, firmly set, properly marked and witnessed as described in the official record.

---

N. 0°02' W., on resurvey line, along E. boundary of section 13.

19.68 Mid-point between the closing corner of secs. 18 and 19, and 19 and 30.

Set an iron post, 3 ft. long, 1 in. diameter, 20 ins. in the ground to rock, and supported in a mound of stone, for ¼ section corner on W. boundary of section 19, T. 37 S., R.15 W., with brass cap marked

A cedar, 8 ins. diameter, bears S.72¼°E., 32 links distant, marked L6 S6 BT

75.07 Intersect the corner of Ts. 36 and 37 S., R. 15 W., an iron post, 3 ins. diameter, firmly set, properly marked and witnessed as described in the official record.

Corner on steep NE. slope.

80.78 Intersect the corner of sections 25 and 36, T. 36 S., R. 16 W., a limestone, showing 8x10x10 ins. above ground, firmly set, properly marked and witnessed, as described in the official record.

Corner stands on steep SW. slope.

---

DEPENDENT RESURVEY OF SUBDIVISIONAL LINES OF
T. 37 S., R. 15 W.

Reestablishment of surveys executed by
T.C.Bailey, Deputy Surveyor, in 1881.

Beginning at the original corner of sections 19, 24, 25, and 30, on E. boundary of township, an iron post, 2 ins. diameter, recently set by me at the original corner point, and described in notes of resurveys of T. 37 S., R. 14 W., this Group.

For establishment of true meridian from observations made upon Polaris at this corner on July 13, 1939, see notes of T. 37 S., R. 14 W.

Thence

S.87°59'W., on resurvey line, between sections 24 and 25.

Over rolling and hilly land, through medium dense timber and scattering undergrowth; gradually ascend E. slope.

28.30 Forest Service fence, 4 strand barbed wire, bears N.10°W. and S.10°E.; leave medium dense, enter scattering timber and medium dense tall brush, bears N. and S.

40.10 Proportionate distance; no evidence of old ¼ section cor.

Set an iron post, 3 ft. long, 1 in. diameter, 10 ins. in the ground to rock, and supported in a mound of stone to top, for restored ¼ section corner of sections 24 and 25, with brass cap marked

$$\frac{1}{4}\ \frac{S24}{S25}$$

1939

from which

Chains

A pinon, 9 ins. diameter, bears S.13°W., 16 links distant, marked ¼ S25 BT

A cedar, 6 ins. diameter, bears N.36½°W., 110 links distant, marked ¼ S24 BT

Corner stands on gradual E. slope, 170 ft. above section corner.

Ascend steeper E. slope, reentering medium dense timber, and rolling mountainous land, bears NE. and SE.

51.40 Ridge, 125 ft. above ¼ section corner, slopes N.80°E., and bears S.10°W.; descend NW. slope 40 ft.

55.50 Small draw, drains N.; ascend 30 ft.

56.30 Low spur, slopes N.; descend 65 ft.

60.20 Draw, drains N.; ascend NE. slope 200 ft.

79.50 Ridge, bears NW. and SE.

80.20 Proportionate distance; no evidence of old section corner.

Set an iron post, 3 ft. long, 2 ins. diameter, 10 ins. in the ground to rock, and supported in a mound of stone to top, for restored corner of sections 23, 24, 25 and 26, with brass cap marked

A pinon, 7 ins. diameter, bears N.21½°E., 40 links distant, marked T37S R15W S13 BT

A cedar, 8 ins. diameter, bears S.37°E., 58 links distant, marked T37S R15W S24 BT

A pinon, 7 ins. diameter, bears S.65°W., 111 links distant, marked T37S R15W S23 BT

A cedar, limb, 6 ins. diameter, bears N.49°W., 87 links distant, marked T37S R15W S14 BT

Corner stands on S. slope, on small rise, sloping SW.

Land, mountainous.
Soil, rocky clay and gravel; 3rd to 4th rate.
Timber, cedar and pinon.
Undergrowth, sagebrush, with some scattering service and oak brush.
Fair grazing land.

---

From the corner of sections 13, 18, 19 and 24, on E. boundary of township, an iron post, 2 ins. diameter, recently established by me under this Group, and described in resurveys of T. 37 S., R. 14 W.

Thence

West, on true line, on sectional correction line, between sections 13 and 24.

Over mountainous land, through dense timber and scattering undergrowth; ascend along steep S. slope 15 ft. to

| | |
|---|---|
| 4.00 | Top of rise, on S. slope; descend 45 ft. |
| 11.80 | Depression, drains S.; ascend steep SE. slope 140 ft. |
| 17.10 | Top of ascent, on S. slope, bears N. about 10 chains distant, to S. face of cliffs; descend along a steep, broken general southerly slope, 210 ft. to ¼ section cor. |

| Chains | |

|---|---|
| | A cedar, 9 ins. diameter, bears S.60½°W., 176 links distant, marked T37S R15W S19 BT |
| | A cedar limb, 7 ins. diameter, bears N.51¼°W., 106 links distant, marked T37S R15W S18 BT |
| | No tree within limits in section 20. |
| | Land, mountainous.<br>Soil, gravelly clay and rocky; 3rd rate.<br>Timber, cedar, pinon and mahogany.<br>Undergrowth, sage, oak, service and buck brush.<br>Fair grazing. |
| | East, on random line, between sections 17 and 20. |
| 40.00 | Set temporary ¼ section corner. |
| 80.00 | Intersect N. and S. line, 9 links N. of the corner of sections 16, 17, 20 and 21. |
| | Thence |
| | N.89°56'W., on true line, between sections 17 and 20. |
| | Over mountainous land, through scattering timber and medium dense undergrowth; slight descent along a steep, brushy N. slope of ridge near top. |
| 15.00 | Leave N. slope, begin steep descent over NW. and W. slopes. |
| 29.60 | Small ravine, at base of steep descent, heads S. about 10 chains, drains N.; thence gentle descent along rolling N. slope. |
| 35.80 | Draw, at base of descent, heads SW. about 10 chains, drains NE.; ascend E. slope 30 ft. |
| 40.00 | On a gradual brushy E. slope, 330 ft. below section corner. |
| | Set an iron post, 3 ft. long, 1 in. diameter, 12 ins. in the ground to rock, and surrounded in a mound of stone to top, for ¼ section corner, with brass cap marked<br>¼ S 17 / S 20 / 1939 |
| | No other accessories available. |
| | Gradually ascend rolling E. to NE. slopes 220 ft. |
| 52.80 | Divide ridge, bears NW. and rises S.20°E. about 5 chains to small peak, thence SW. to Cove Mountain. |
| | Descend rolling general W. slope, through dense, tall brush 280 ft. |
| 80.00 | The corner of sections 17, 18, 19, and 20. |
| | Land, mountainous.<br>Soil, dark gravelly clay loam and rocky; 3rd rate.<br>Timber, cedar, pinon and mahogany.<br>Undergrowth, sage, oak, service and bitter brush.<br>Good grazing land. |

Chains

West, on true line, between sections 18 and 19.

Over mountainous land, through scattering timber and dense, tall undergrowth; gently descending along N. slope.

4.80 N. point of low rise, bears S. to spur.

28.30 Draw, 200 ft. below section corner, drains S.70°W.; slight ascent over rolling S. slope, 50 ft. to ¼ section corner.

38.10 Small branch ravine, drains S. about 2 chains to junction with above draw.

40.00 On E. slope.

Set an iron post, 3 ft. long, 1 in. diameter, 20 ins. in the ground to rock, and supported in a mound of stone to top, for ¼ section corner, with brass cap marked

¼ S 18 / S 19 / 1939

from which

A cedar, 16 ins. diameter, bears N.7°E., 42 links distant, marked ¼ S18 BT

A cedar, 10 ins. diameter, bears S.70°45'E., 72 links distant, marked ¼ S19 BT

Ascend steep SE. slope 170 ft.

51.00 Top of ascent; on S. slope of peak, summit of which bears N. about 5 chains distant; continue along S. slope to

55.40 Begin descent over rolling SW. slope; a low spur slopes off to SW.

75.90 Draw, at base of steep descent, 330 ft. below top of ascent, drains SW.; gradually ascend rolling general S. slope, through dense timber.

80.00 On a gradual SE. slope, 25 ft. above draw.

Set an iron post, 3 ft. long, 1 in. diameter, 4 ins. in the ground to rock, and supported in a mound of stone to top, for corner of lots 7 and 8, section 18, and of lots 1 and 2, section 19, with brass cap marked

S 18 / 7 8 / 2 1 / S 19 / 1939

from which

A pinon, 10 ins. diameter, bears N.31½°E., 61 links distant, marked S18 L8 BT

A cedar, 4 ins. diameter, bears S.54°E., 69 links distant, marked S19 L1 BT

A cedar limb, 7 ins. diameter, bears S.15½°W., 46 links distant, marked S19 L2 BT

A cedar, 5 ins. diameter, bears N.18°W., 17 links distant, marked S18 L7 BT

| Chains | |
|---|---|
| 91.90 | Top of low rise, on S. slope, 60 ft. above lot corner, slopes off S.; gradually descend 60 ft. to |
| 97.95 | Intersect W. boundary of township on E. boundary of section 13. |

Set an iron post, 3 ft. long, 2 ins. diameter, 18 ins. in the ground to rock, and supported in a mound of stone to top, for closing corner of sections 18 and 19, with brass cap marked

T37S | T37S

from which

A pinon, 8 ins. diameter, bears N.8°45'E., 60 links distant, marked T37S R15W S18 CC BT

A cedar, 7 ins. diameter, bears S.11½°E., 96 links distant, marked T37S R15W S19 CC BT

From this closing corner the corner of sections 12 and 13, heretofore described, bears N.0°14'E., 20.11 chains distant.

Land, mountainous.
Soil, gravelly and rocky clay loam, lying on rock subsoil; 3rd rate.
Timber, cedar, pinon and mahogany.
Undergrowth, sage, oak, service and bitter brush.
Fair grazing land.

---

From the corner of sections 17, 18, 19 and 20.

N.0°01'W., between sections 17 and 18.

Over mountainous land, through scattering timber and medium dense undergrowth; slight descent NW. exposure to

| | |
|---|---|
| 4.30 | A main draw, drains S.80°W.; ascend rolling S. slope. |
| 14.00 | Slope changes from a S. to SW. slope. |
| 20.00 | Cross head of depression, drains SW. |
| 30.30 | High divide ridge, 450 ft. above section corner, bears NW. 1 chain to rocky point, thence N.25°W. and S.60°E. for about 10 chains, thence SE.; descend along steep, rocky E. and NE. slope 125 ft. |
| 40.00 | In N. edge of bottom of draw, near head, drains NE. for 5 chains, thence SE. |

Set an iron post, 3 ft. long, 1 in. diameter, 27 ins. in the ground, for ¼ section corner, with brass cap marked

¼

A cedar, 10 ins. diameter, bears S.21°E., 74 links distant, marked T37S R15W S5 CC BT ✓

A pinon, 7 ins. diameter, bears S.17½°W., 36 links distant, marked T37S R15W S6 CC BT ✓

Corner stands on gradual SW. slope 1 chain W. of low spur.

From this closing corner W. 5.06 chains distant to the corner of sections 5, 6, 31 and 32, an iron post, 3 ins. diameter, properly set, marked and witnessed, as described in the official record of T. 36 S., R. 15 W. As this cor. now functions only for sections 31 and 32, in T. 36 S., I efface the marks on post and bearing trees that pertain to sections 5 and 6.

Land, mountainous.
Soil, gravelly clay and rocky; 3rd to 4th rates.
Timber, cedar and pinon.
Undergrowth, sage, oak, service and browse.
Fair grazing land.

---

DEPENDENT RESURVEY WITH ESTABLISHMENT OF QUARTER SECTION CORNERS for T.37 S.,R.15 W.,ON PORTION OF NORTH BOUNDARY.

From the corner of sections 3, 4, 33 and 34, on N. boundary of T. 37 S., R. 15 W., heretofore described.

S.89°50'W., along N. boundary of section 4.

No topography is recorded as there was no material discrepancy found along this line.

35.13 Easting of 40.00 chains from the closing corner of sections 4 and 5.

Set an iron post, 3 ft. long, 1 in. diameter, 12 ins. in the ground to rock, and supported in a mound of stone to top, for ¼ section corner on N. boundary of section 4, with brass cap marked

¼ S4
1939

from which

A cedar, 6 ins. diameter, bears S.65½°E., 76 links distant, marked ¼ S4 BT ✓

A cedar, 16 ins. diameter, bears S.85½°W., 40 links distant, marked ¼ S4 BT ✓

Corner stands on E. slope of spur in dense timber.

181

RESURVEY OF NORTH BOUNDARY, T. 37 S., R. 15 W.

Chains

40.10 Intersect the ¼ section corner originally set for sections 4 and 33, an iron post, 1 in. diameter, properly set, marked and witnessed, as described in the resurvey of S. boundary of T. 36 S., R. 15 W., in 1909. As this cor. now functions only for section 33, I efface the marks on post and bearing tree that refer to section 4.

Thence

S.89°52'W., with continuous measurement.

75.13 Intersect the closing corner of sections 4 and 5, hereinbefore described.

---

S.89°52'W., along N. boundary of section 5.

5.16 Intersect the angle point originally set as corner of sections 4 and 5, an iron post, 3 ins. diameter, heretofore described.

Thence

West, with continuous measurement.

7.91 Intersect the closing corner of sections 32 and 33, on S. boundary of T. 36 S., R. 15 W., an iron post, 2 ins. diameter, properly set, marked and witnessed, as described in the official record.

40.05 Midpoint between the closing corners of sections 4 and 5, and sections 5 and 6.

Set an iron post, 3 ft. long, 1 in. diameter, 27 ins. in the ground, for ¼ section corner, on N. boundary of section 5, with brass cap marked

¼ S5
1939

from which

A pinon, 10 ins. diameter, bears S.12½°E., 13 links distant, marked ¼ S5 BT

A pinon, 10 ins. diameter, bears S.40°E., 34 links distant, marked ¼ S5 BT

Corner stands on NW. slope in dense timber.

45.16 The ¼ section corner originally set for sections 5 and 32, an iron post, 1 in. diameter, properly set, marked and witnessed, as described in the official record of the resurvey of the S. boundary of T. 36 S., R. 15 W., in 1909. This corner now functions only as the ¼ section corner on the S. boundary of section 32, I therefor efface the marks on post and bearing tree that refer to section 5, and as the NW. bearing tree is dead I mark an additional tree as follows

A cedar, 10 ins. diameter, bears N.59°E., 80 links distant, marked ¼ S32 BT

Continue W. with continuous measurement.

80.10 Intersect the closing corner of sections 5 and 6, hereinbefore described.

| Chains | |
|---|---|
| | West, along N. boundary of section 6. |
| 5.06 | The corner of sections 31 and 32, on S. boundary of T. 36 S., an iron post, 3 ins. diameter, hereinbefore described. |
| 40.00 | Set an iron post, 3 ft. long, 1 in. diameter, 27 ins. in the ground, for ¼ section corner, on N. boundary of section 6, with brass cap marked<br>¼ S6<br>1939<br>from which<br>A cedar, 7 ins. diameter, bears S.36½°E., 31 links distant, marked ¼ S6 BT<br>A pinon, 8 ins. diameter, bears S.58°45'W., 113 links distant, marked ¼ S6 BT<br>Corner stands on W. slope in dense timber. |
| 41.50 | Forest Service fence, 4 strand barbed wire, bears N.30°E. and S.30°W. |
| 45.06 | The ¼ section corner originally set for sections 6 and 31, an iron post, 1 in. diameter, properly set, marked and witnessed, as described in the resurvey of S. boundary of T. 36 S., R. 15 W., in 1909. This corner now functions only as the ¼ section corner on the S. boundary of section 31; I therefore efface the marks on post and bearing tree that refer to section 6, and mark an additional tree as follows<br>A pinon, 8 ins. diameter, bears N.73°E., 35 links distant, marked ¼ S31 BT |
| 80.00 | Set an iron post, 3 ft. long, 1 in. diameter, 6 ins. in the ground to rock, and supported in a mound of stone, for corner of lots 4 and 5, section 6, with brass cap marked<br>5 \| 4<br>S6<br>1939<br>from which<br>A pinon, 6 ins. diameter, bears S.82°45'E., 139 links distant, marked S6 L4 BT<br>A pinon, 8 ins. diameter, bears S.48°W., 41 links distant, marked S6 L5 BT<br>Corner stands on steep SW. slope in scattering timber. |
| 97.96 | The closing corner of Ts. 36 and 37 S., R. 15 W., an iron post, 3 ins. diameter, hereinbefore described. |

## GENERAL DESCRIPTION

All of this township comes within the Dixie National Forest. The area under this completion survey consists mainly of rolling to rough mountainous land, lying at elevations of from about 6000 to 7500 feet above sea

Chains

level. In the west-central part is a summit of a rolling range of mountains with a north-south trend, extending from section 32 on the south to section 5 on the north boundary. In the east central part is a rough mountain, the highest point, being in section 13, and is known as Kane Point.

Scrub cedar and pinon pine, with some mountain mahogany, are found throughout the township. It is of value only for firewood and fence posts. The predominating undergrowth is sage, oak, and service brush. The land is suitable only for grazing.

The soil is principally a clay loam, mixed with gravel and rocks, and rocky of granite and volcanic formations, and can be classified, in general, as third rate. Some deep, fine, sandy clay loam is found along the bottoms of canyons and ravines.

The greater part of the township drains into Pinto Creek, which flows northerly through the central portion. The land along the west boundary drains westerly into Meadow Valley.

The only water found in the area under this survey are two springs, - Cove spring, located in the NW¼ NE¼ of section 28, and Kane Spring, located in the NW¼ NW¼ of section 24.

Fences constructed by the Forest Service constitute about the only improvements in the newly surveyed areas.

The settlement of Pinto is located in section 34 of the previously surveyed area. An unimproved road, and a one-wire telephone line between Pinto and Newcastle follows along Pinto Creek.

There are no settlers living in the newly surveyed portion. No indications of mineral, coal or oil were noted.

No magnetic declination was taken on account of defective needle.

## CERTIFICATE OF SURVEYOR

488

I, Andrew Nelson, Surveyor, HEREBY CERTIFY upon honor that, in pursuance of special instructions bearing date of the 11th day of May, 1939, received from the district cadastral engineer for Utah, with assignment instructions dated June 22, 1939, I have ~~surveyed~~ made a dependent resurvey of portions of east boundaries of Ts. 36 and 37 S., R. 16 W.; portion of north boundary and subdivision, and survey of subdivisions, completing T. 37 S., R. 15 W.

of the Salt Lake Meridian, in the State of Utah, which are represented in the foregoing field notes as having been executed by me and under my direction; and that said survey has been made in strict conformity with said instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in the specific manner described in the foregoing field notes.

Salt Lake City, Utah
May 4, 1940

Andrew Nelson
Surveyor

## CERTIFICATE OF APPROVAL

OFFICE OF SUPERVISOR OF SURVEYS,

Denver, Colo., May 1, 1944

The foregoing field notes of the ~~survey~~ dependent resurvey of portions of east boundaries of Ts. 36 and 37 S., R. 16 W.; portion of north boundary and subdivision, and survey of subdivisions, completing T. 37 S., R. 15 W.

executed by Andrew Nelson, Surveyor, under special instructions dated May 11, 1939, and assignment instructions dated June 22, 1939, having been critically examined, and the necessary corrections made prior to their certification by the engineer, the said field notes, and the survey therein described, are hereby approved.

C. Horton Jr.
Acting Supervisor of Surveys.

## CERTIFICATE OF TRANSCRIPT

I CERTIFY that the foregoing transcript of the field notes of the above-described surveys in _____, is a true copy of the original field notes on file in the public survey office.
